

## Mobile APP

PART 1	PART 2	PART 3
300 math questions	Educational part	Games
<b>Activity leader: Colegio Montesclaros</b> <ul style="list-style-type: none"> <li>The coordinator will prepare 120 questions.</li> <li>Spanish partner will complete until reaching the 300 questions.</li> </ul>	<b>Activity leader: Aristotelio Ekpedeftirio</b> <ul style="list-style-type: none"> <li>The Greek partner will be in charge of preparing the educational part.</li> </ul>	<b>Activity leader: Colegiul National "Spiru Haret"</b> <ul style="list-style-type: none"> <li>The Romanian partner will choose the most appropriate games to be included in the mobile app.</li> </ul>

- All partners are expected to contribute for the development of the mobile application.
- Istituto Modartech / Karaman II Milli Egitim Mudurlugu will be responsible to provide the final result (mobile app).

### PART 1

## Math Questions

### Instructions and Deadlines:

DATES	TASK	RESPONSIBILITY
<b>10/11/2023</b>	<ul style="list-style-type: none"> <li>The project coordinator prepares 120 questions and send it to the Spanish team.</li> </ul>	Karaman II Milli Egitim Mudurlugu
<b>15/12/2023</b>	<ul style="list-style-type: none"> <li>The Spanish partner will add 180 questions based on the example provided by the coordinator.</li> <li>The 300 questions will be <a href="#">uploaded on GD</a>.</li> </ul>	Colegio Montesclaros
<b>12/01/2024</b>	<ul style="list-style-type: none"> <li>The questions will be evaluated by the research experts in Karaman II Milli Egitim Mudurlugu.</li> <li>A report will be produced in order to attest the validity of the questions for the target-group.</li> </ul>	Karaman II Milli Egitim Mudurlugu

Co-funded by  
the European Union

2

## PART 2

### Educational Part

**Level for examples in each section: Easy to Medium**

**1. Calculations/operations (add, subtract, multiplication and division)**

**2. Multiples and divisors**

**3. Time**

**4. Distance**

**5. Transformations (measure units and money)**

**6. Percentages**

**7. Geometrical figures, perimeters, areas and volumes (3d, 2d)**

**8. Inequalities**

Co-funded by  
the European Union

### Instructions and Deadlines:

DATES	TASK	RESPONSIBILITY
<b>31/12/2024</b>	Send mathematical exercises (for all the 8 parts) to the Greek team	All partners
<b>01/01/2024 – 12/01/2024</b>	Greek team compiles the documents and prepares the 1 <sup>st</sup> draft for the 8 parts. <a href="#">The document has to be uploaded on GD.</a>	Aristotelio Ekpedeftirio
<b>15/01/2024</b>	1 <sup>st</sup> draft is ready	Aristotelio Ekpedeftirio
<b>16/01/2024 – 09/02/2024</b>	Partners revise the 8 parts	All partners
<b>12/02/2024</b>	Deadline for revision	All partners
<b>13/02/2024 – 29/02/2024</b>	Greek team make the necessary changes and provides the final version of the 8 educational parts	Aristotelio Ekpedeftirio
<b>01/03/2024</b>	Final version ready and <a href="#">uploaded on GD.</a>	Aristotelio Ekpedeftirio

3

## PART 3

### Games

#### Instructions and Deadlines:

DATES	TASK	RESPONSIBILITY
<b>17/11/2023</b>	<ul style="list-style-type: none"> <li>Each partner creates <b>3 original games</b> (contemplating instructions).</li> </ul>	All partners
<b>01/12/2023</b>	<ul style="list-style-type: none"> <li>Romanian team will revise the games and decide which ones are suitable for the mobile app.</li> </ul>	Colegiul National "Spiru Haret"
<b>29/03/2024</b>	<ul style="list-style-type: none"> <li>Istituto Modartech will develop the app and insert the games. (<i>If needed, support will be received from the company/university for the game module of the mobile application.</i>)</li> </ul>	Istituto Modartech
<b>15/12/2023</b>	<ul style="list-style-type: none"> <li>Romanian team and the project coordinator will revise the games in the mobile application</li> </ul>	Colegiul National "Spiru Haret"/ Karaman İl Milli Egitim Mudurlugu
<b>April – Mobility in Greece</b>	<ul style="list-style-type: none"> <li>Students will test the 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> draft of the mobile app in the mobility in Greece.</li> </ul>	Host: Aristotelio Ekpedeftirio + All partners
<b>May - June 2024</b>	<ul style="list-style-type: none"> <li>Each partner (TR, GR, ES, PT, RO) asks <b>100 students</b> to test the application;</li> <li>Each partner asks their math teachers to test the application.</li> <li>The coordinator will prepare an evaluation questionnaire for the app and send it to all partners;</li> <li>Partners will translate the questionnaire to their national languages;</li> <li>Partners will apply the questionnaire to students and math teachers alike (to evaluate the app);</li> <li>The coordinator will provide a template for the report;</li> <li>Each partner will resume the evaluation results from their country in this report. The report will be sent to the project coordinator.</li> </ul>	All partners

the European Union

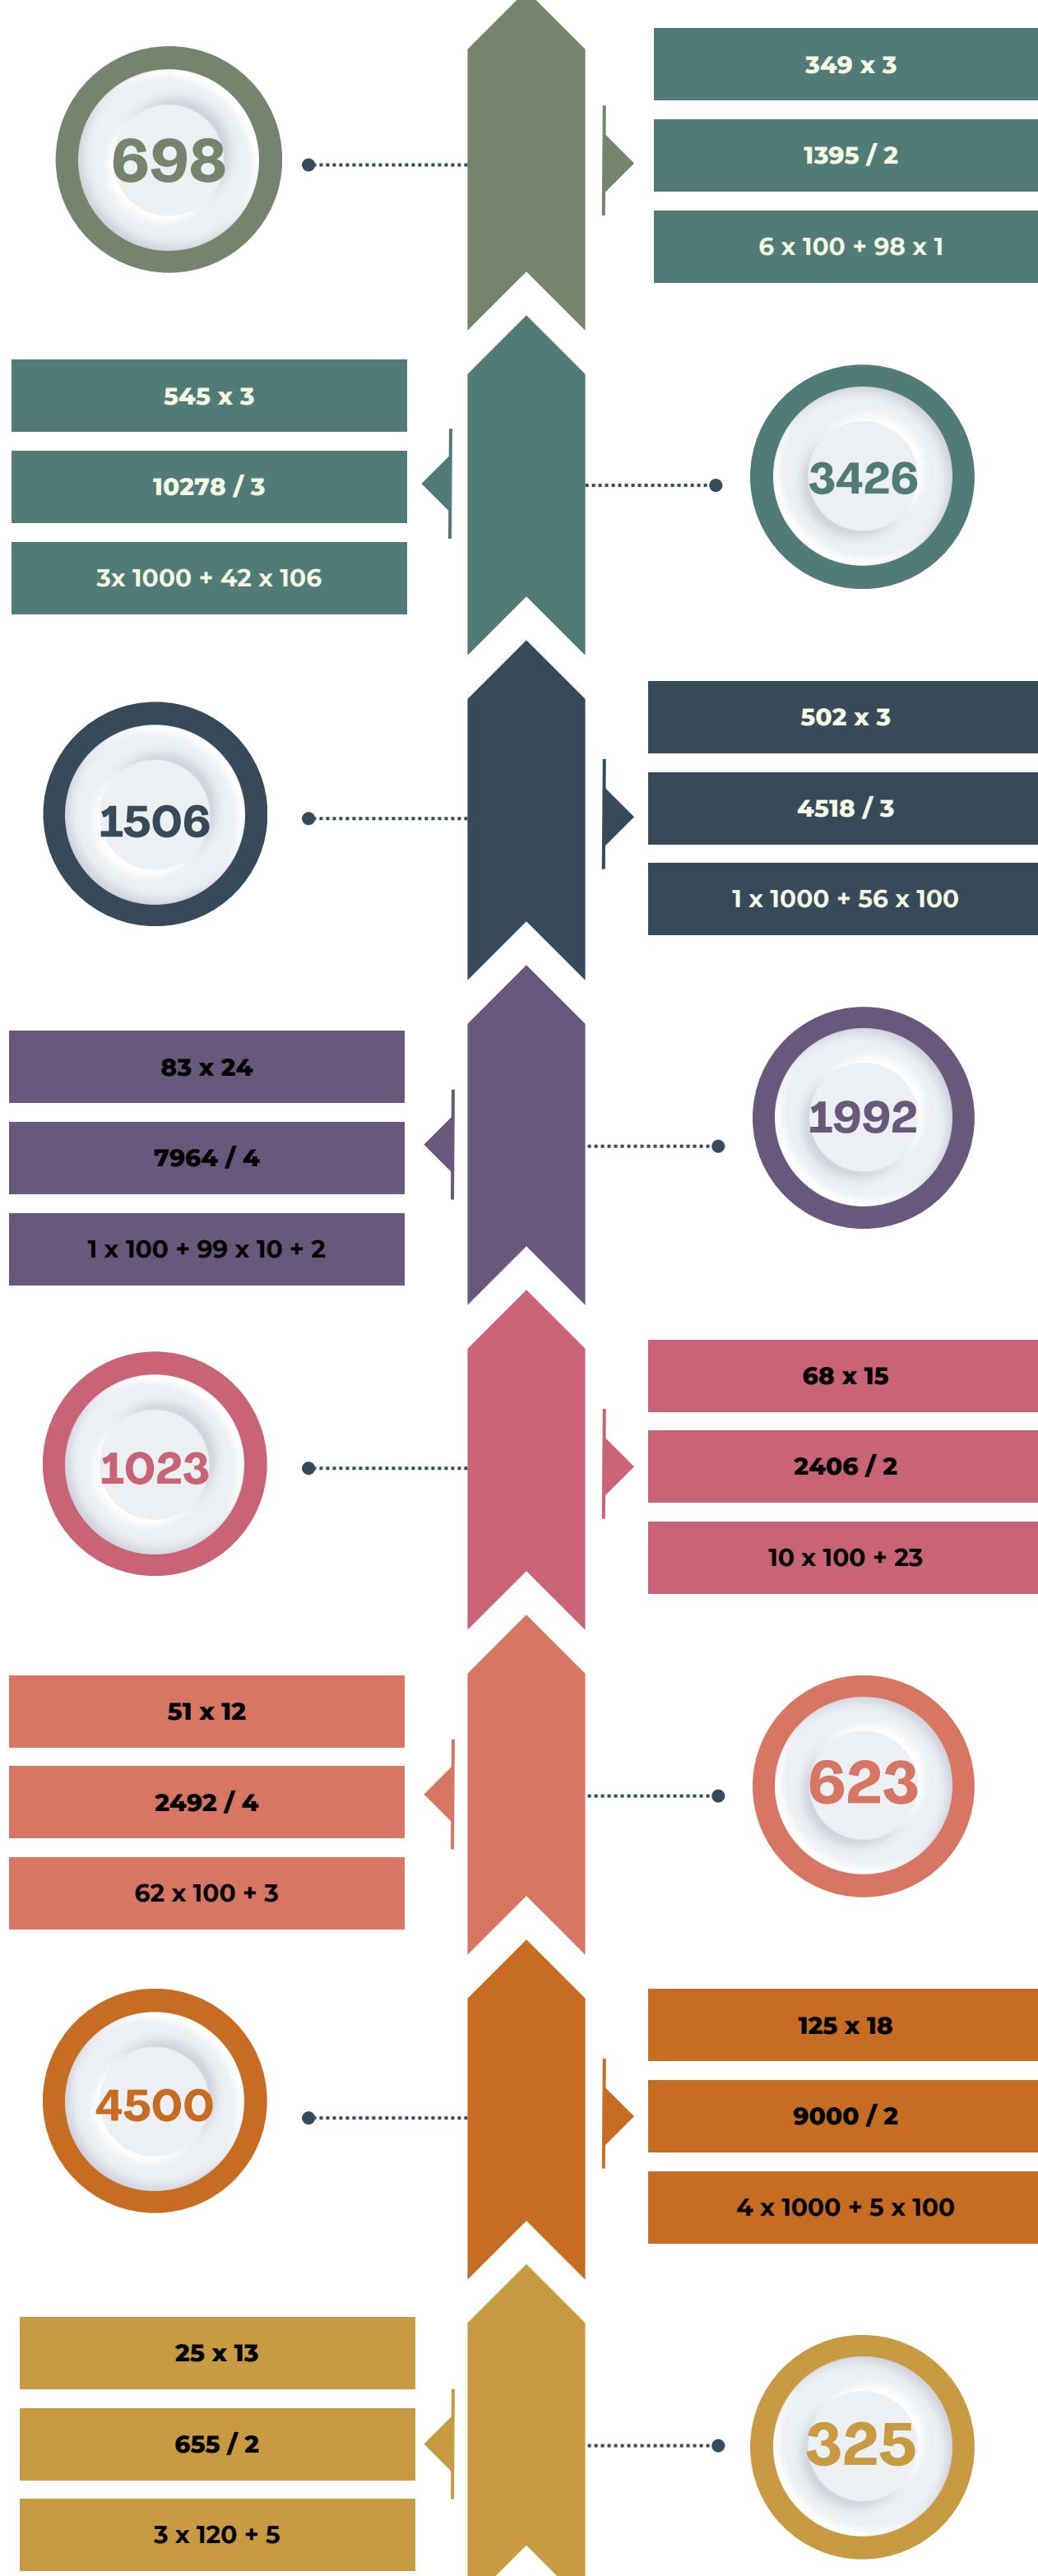

<b>June 2024</b>	<ul style="list-style-type: none"><li>The project coordinator will implement changes according to the gathered results in order to improve the final result.</li></ul>	All partners
<b>24/09/2024</b>	<ul style="list-style-type: none"><li>Final version of the mobile app is ready and uploaded on the project website / Google Play / AppStore</li></ul>	Istituto Modartech/ Karaman İl Milli Egitim Mudurlugu

5

# Choose the right option

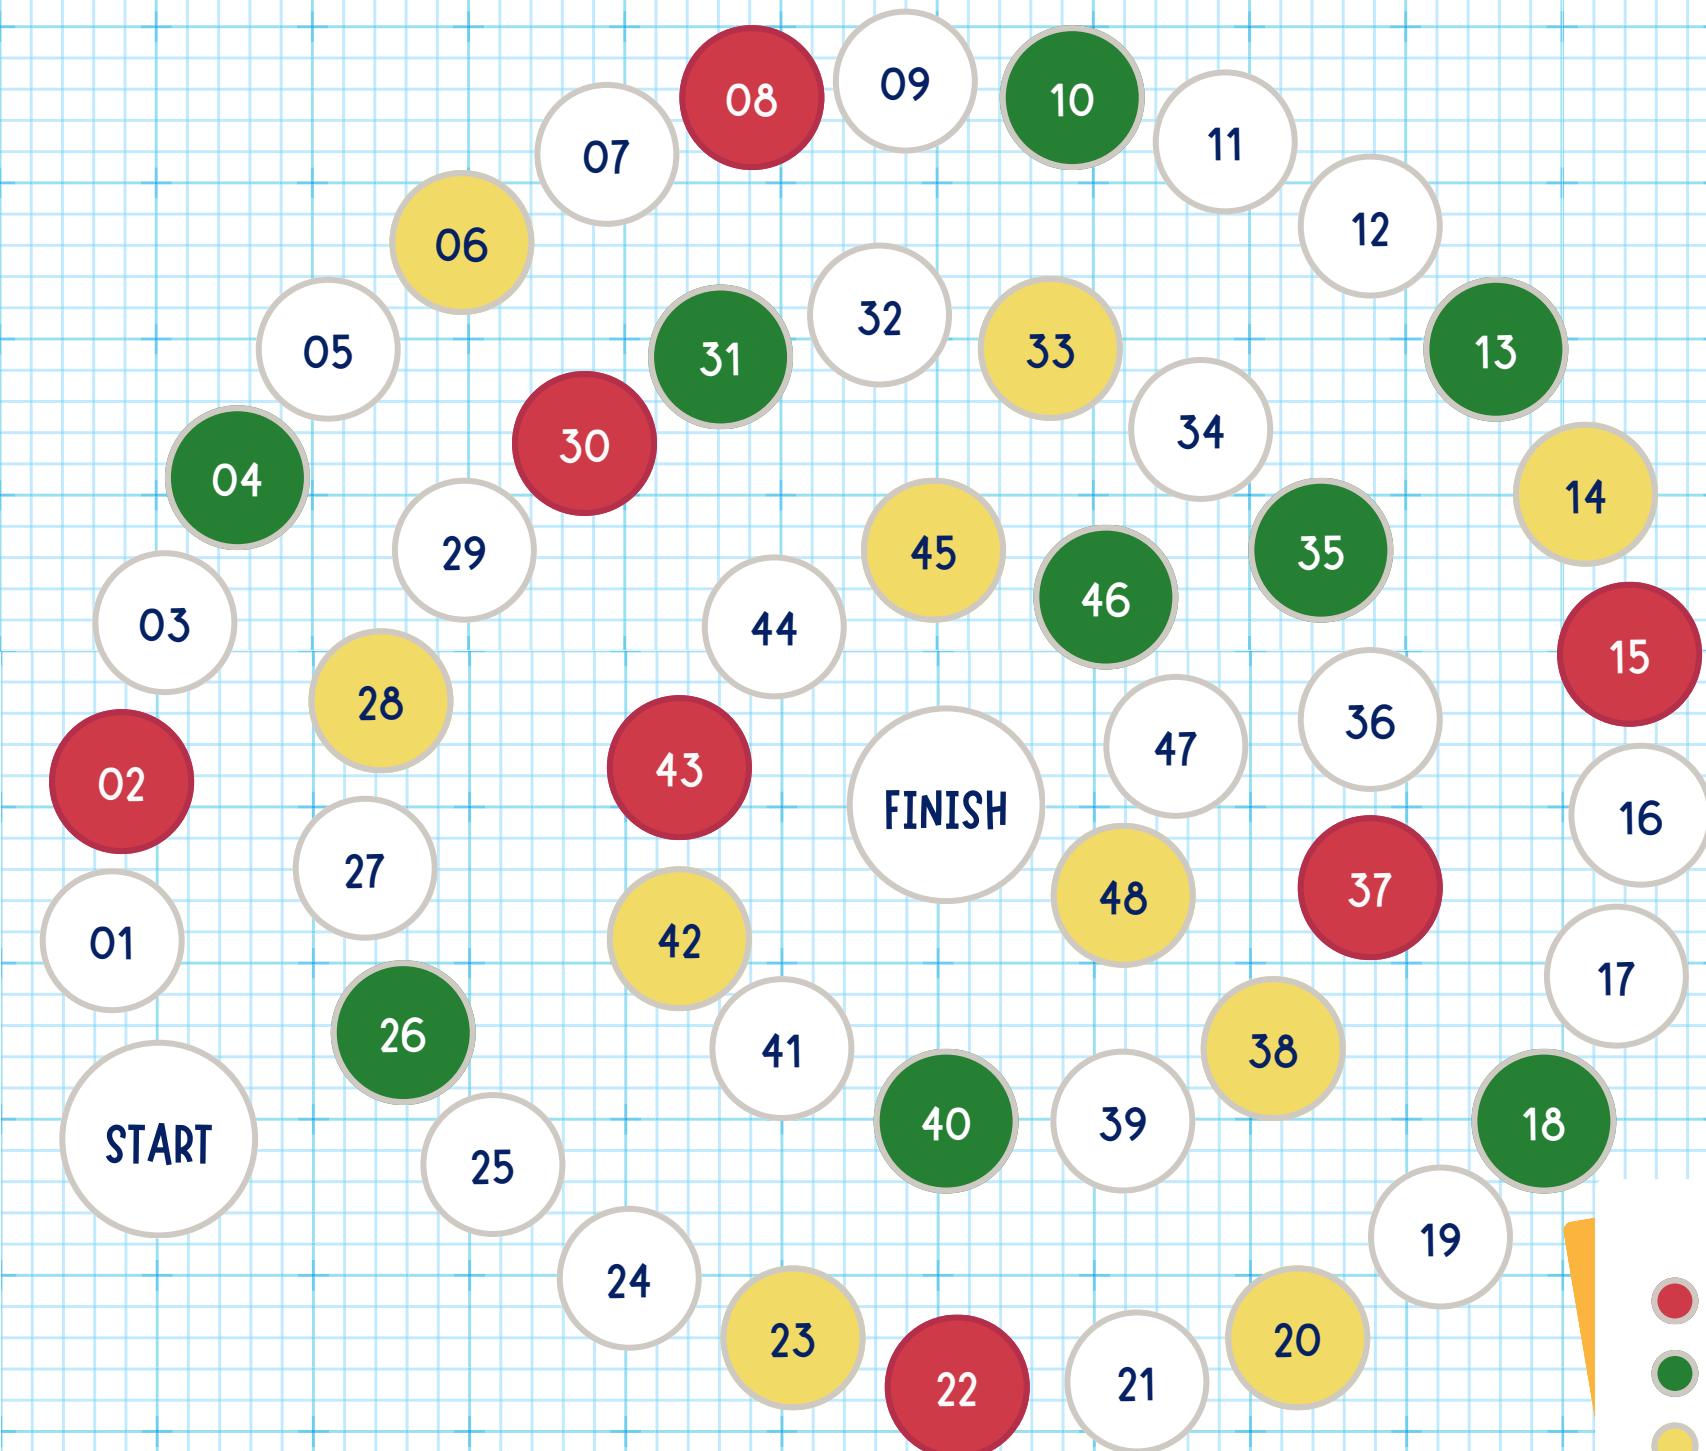

# Choose the right option

## Rules

The game is directed by the orientation of the arrows.

In each box there is a number for which you have to choose the correct operation.

If the operation is correct, you can continue playing to the next square

### GAME RULES

- Pick a red card and do the challenge!
- Pick a green card and do the challenge!
- Pick a yellow card and do the challenge!

# GAME RULES

## Players:

Two or more players.

## Roll the dice:

There are three dice.

Roll the three dice and performs the operation in the order blue, green, red.

The player moves his pin the number he obtained with the dice operation.

## Gambling houses:

The pins must be positioned in the home square: START

If you find yourself on a white square, you must wait until you can play again.

If you find yourself on a red square, you must draw a card with the same color and complete the challenge.

If you find yourself on a green square, you must draw a card with the same color and complete the challenge.

If you find yourself on a yellow square, you must draw a card with the same color and complete the challenge.

If the challenge was not carried out successfully, the player remains in the house for one round.

If the challenge was completed successfully, the player plays again.

The winner is the one who finishes in the final square, with the greatest number of challenges completed

**How many  
hours we  
have in three  
days?**

**How many  
seconds we  
have in three  
minutes?**

**How many  
minutes are  
in two hours?**

**04:35**

1,50€ | 0,55€ | 0,70€

**How many centimeters have a meter?**

With 1L of juice we can feel 10 glass.

How many dl we need to feel each glass?

A bottle have 2L of water.

How many cl we need to feel four glass?

**Put the following temperatures in ascending order:**

38,5°      37,5°  
39,5°

<      <

**Write the decimal number:**

*thirty-six hundredths*

**Which is the tallest?**

Amanda with 1350mm  
John with 145cm  
Paul with 1,52m  
Maria with 13,2dm

**What is the hottest city?**

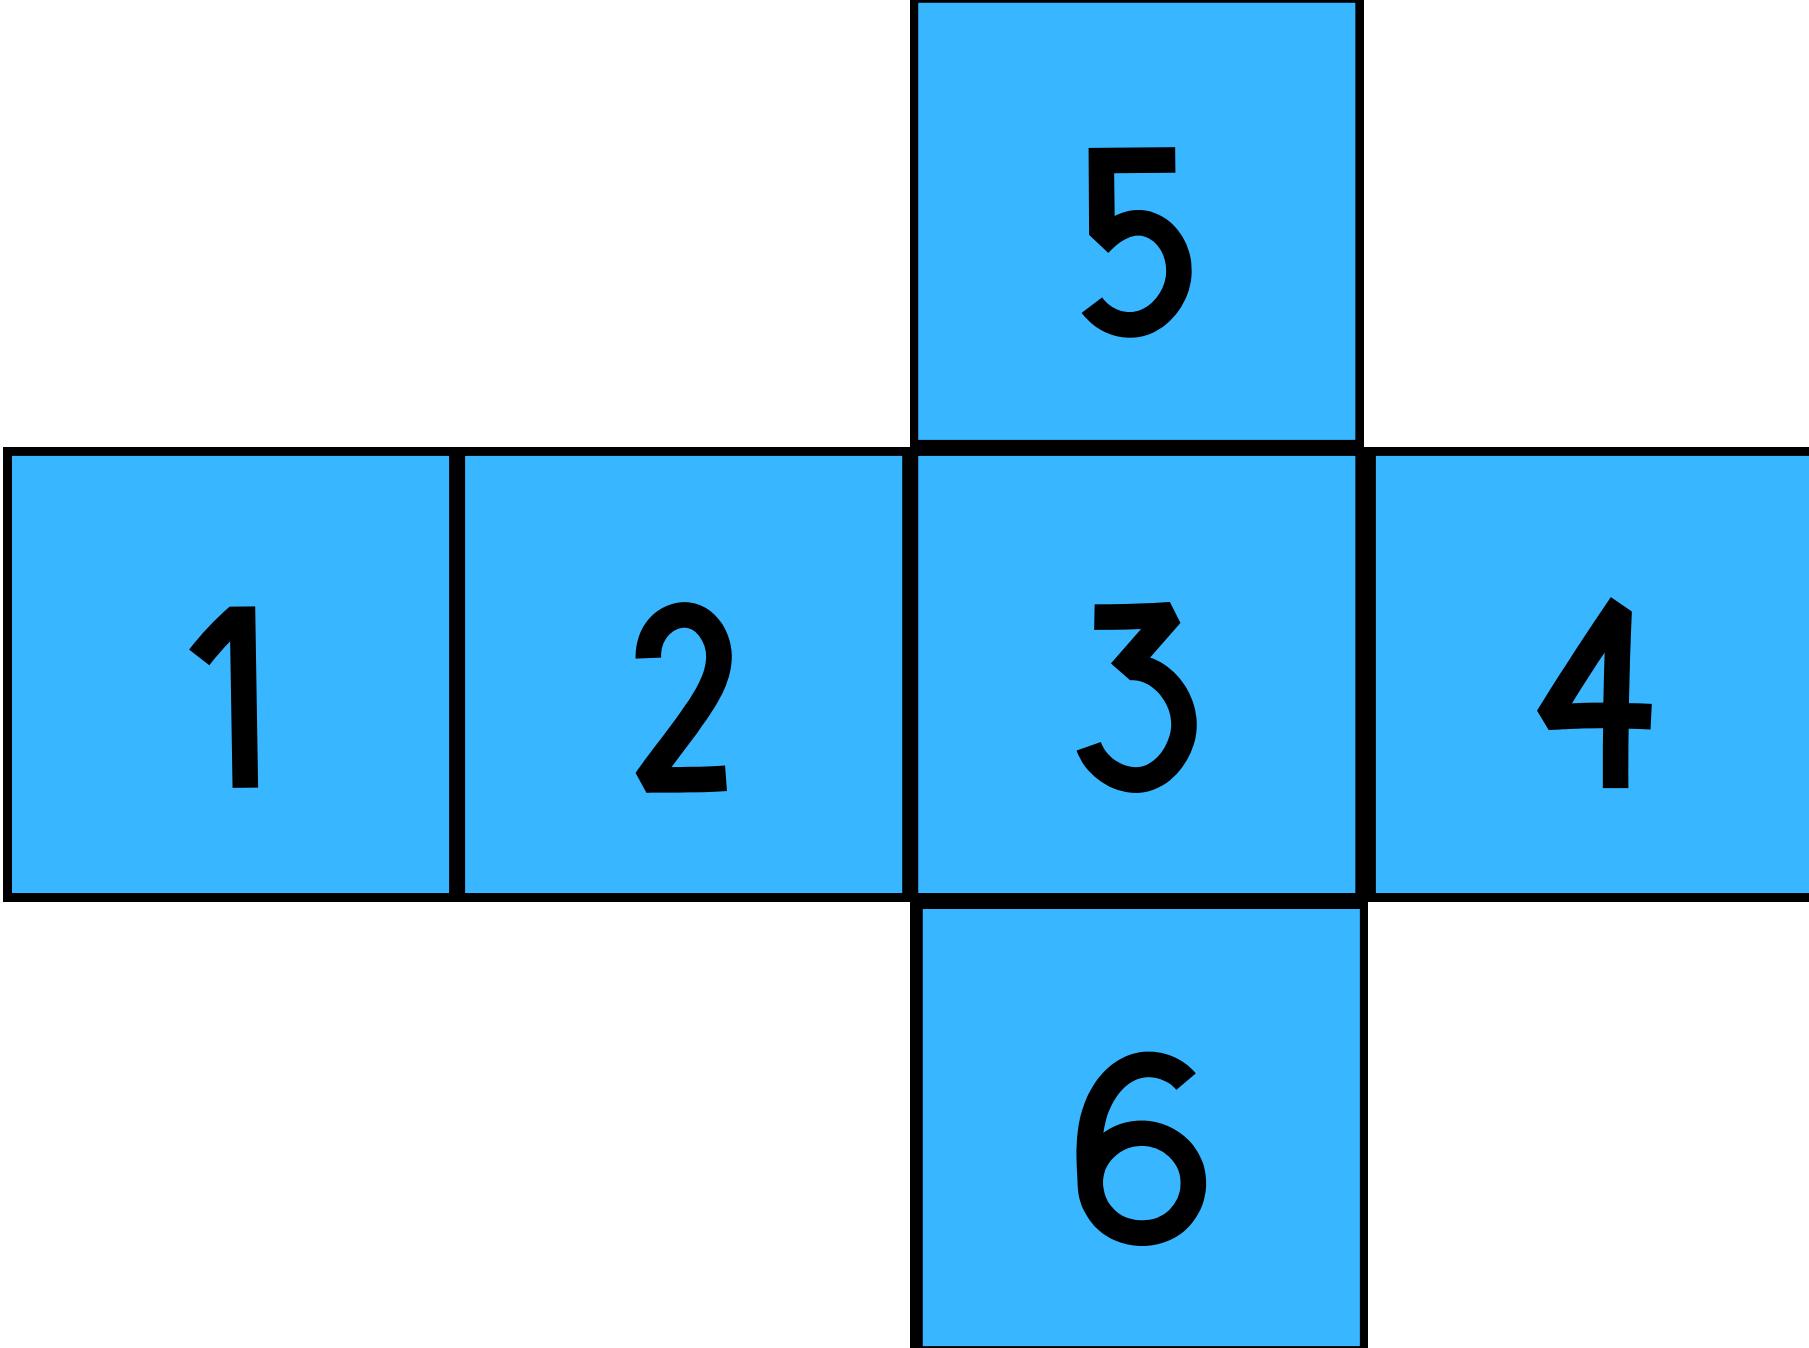

Madrid 24°C  
London 17°C  
Atenas 27°C  
Paris 18°C

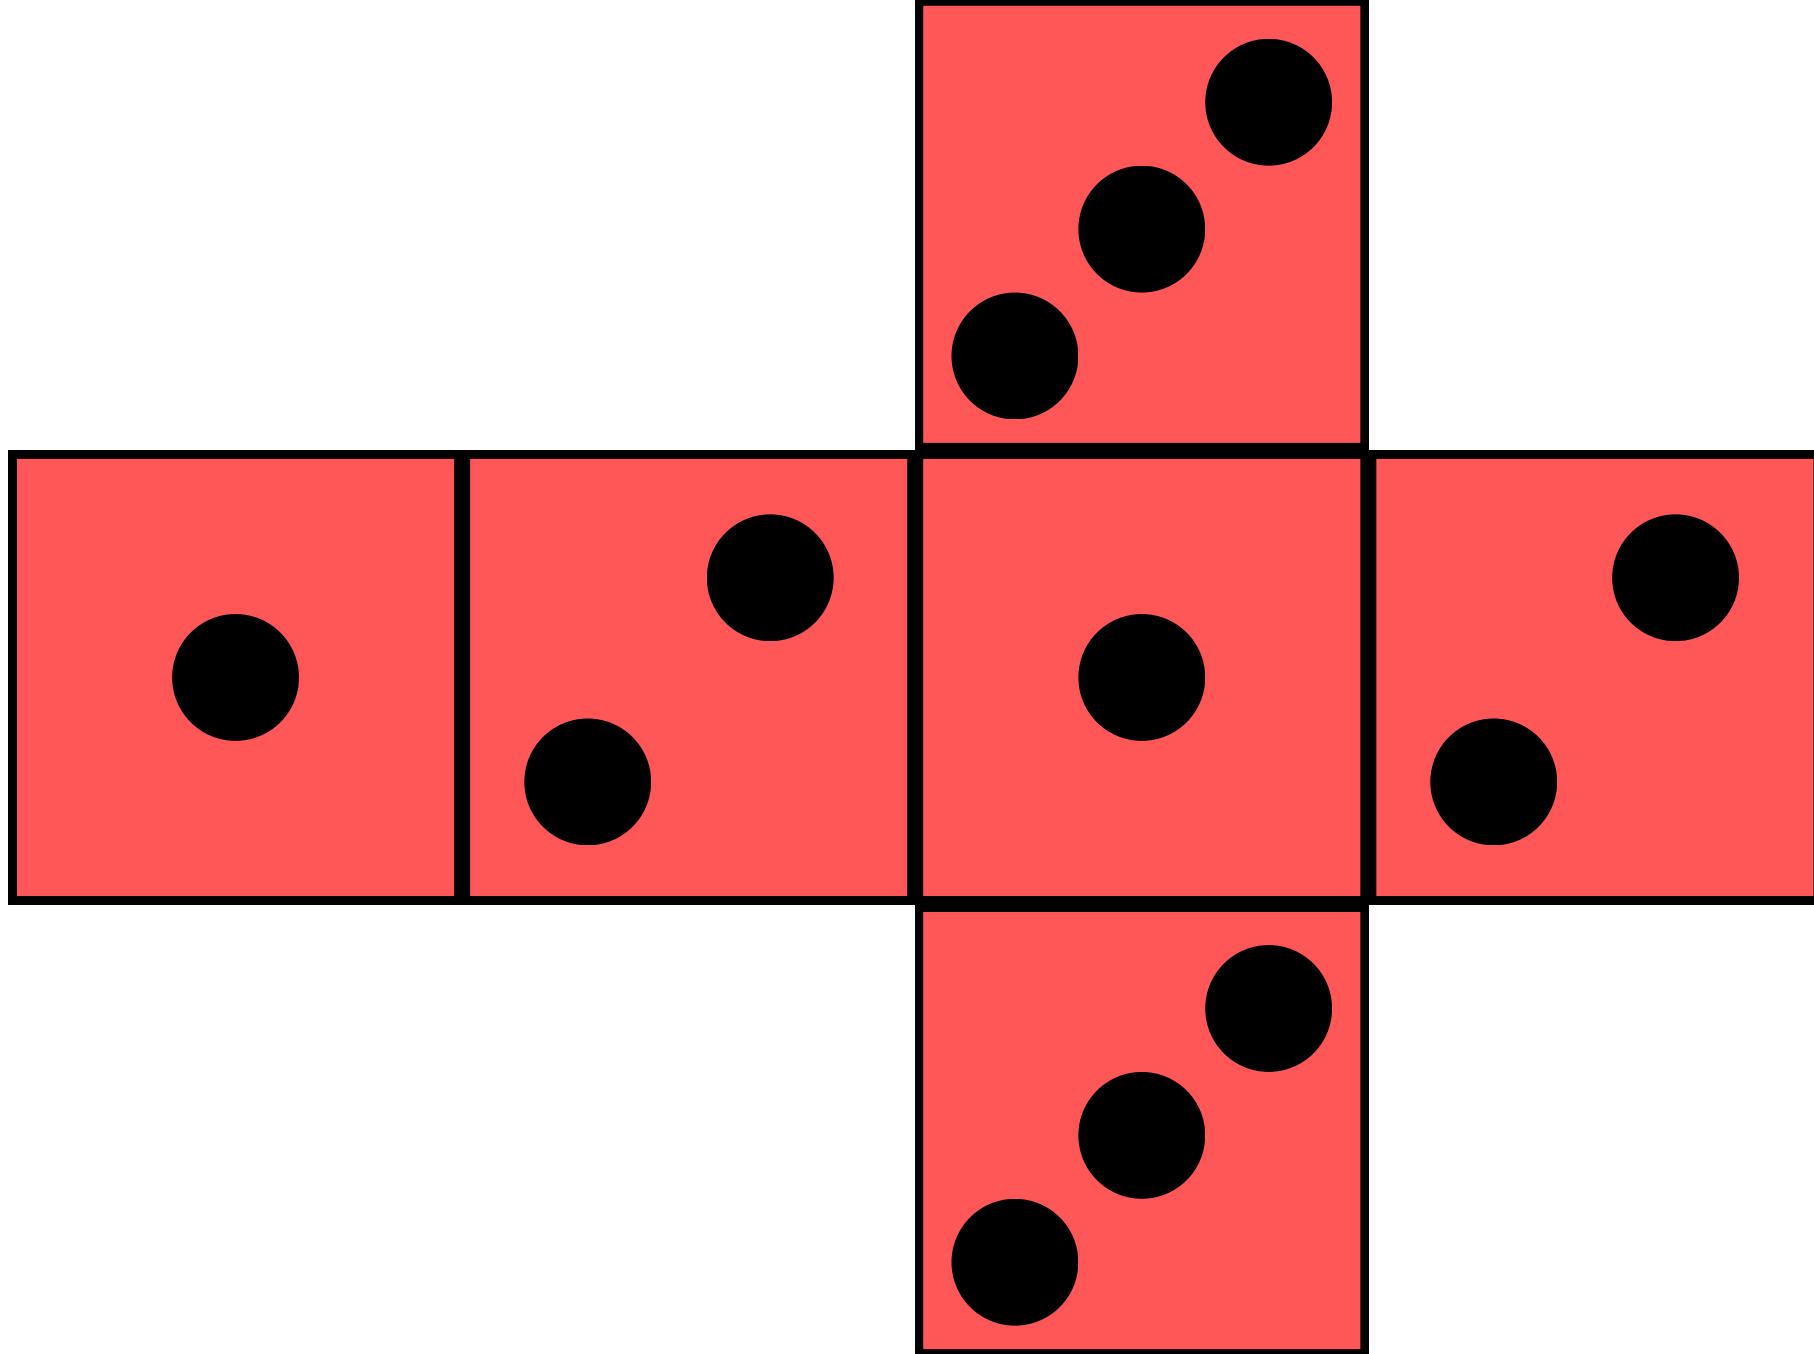

**Write the number:**

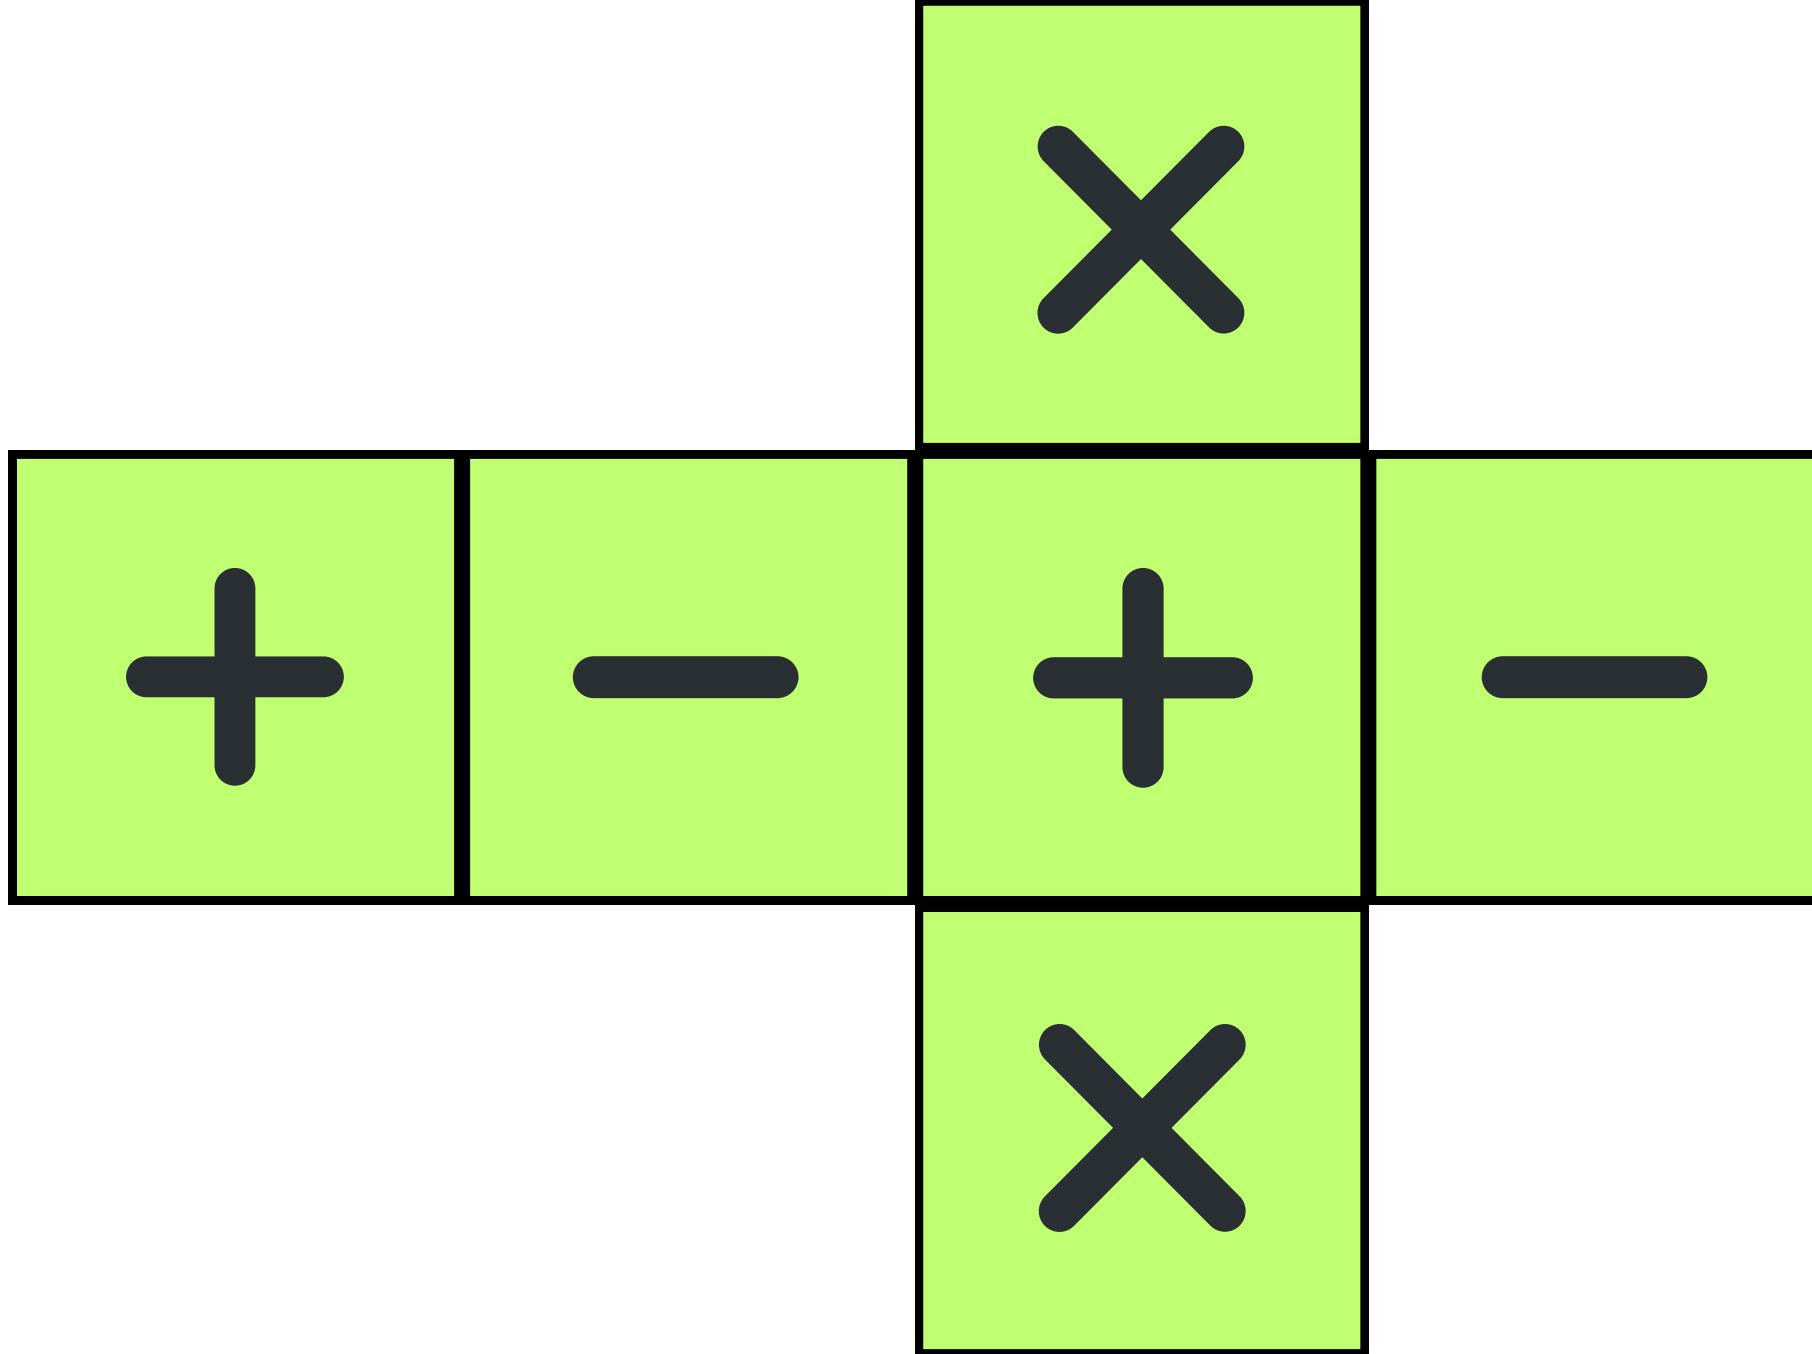

*four hundred and twenty-six*

**A bottle have 0,5L of water.**

How many cl we need to feel two glass?

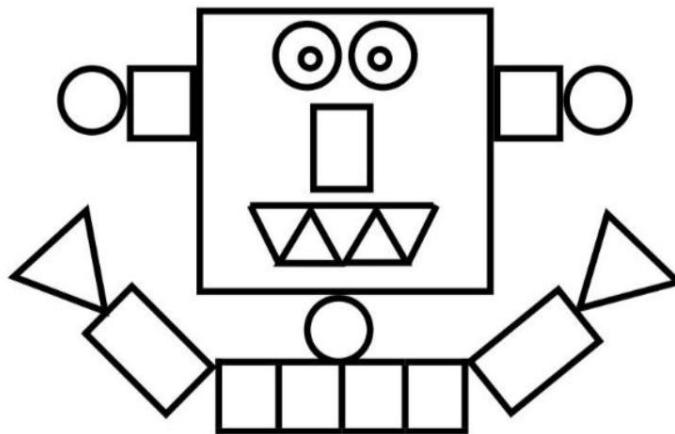

## “COUNT ME IF YOU CAN” RULES

- 1) Count how many geometric shapes there are and write down the number next to each one
- 2) Finally, check your answer by replacing the geometric shapes with the numbers in the equation.

## LET'S PLAY!

Count up the geometric shapes and write the number next to them. Solve the equation to check yourself.

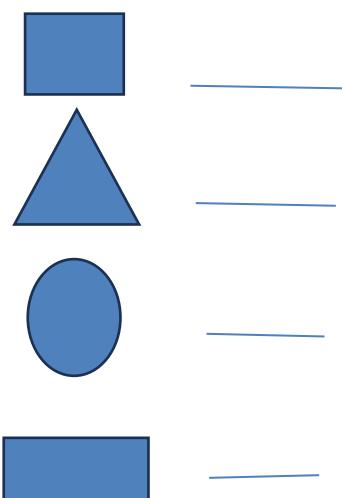

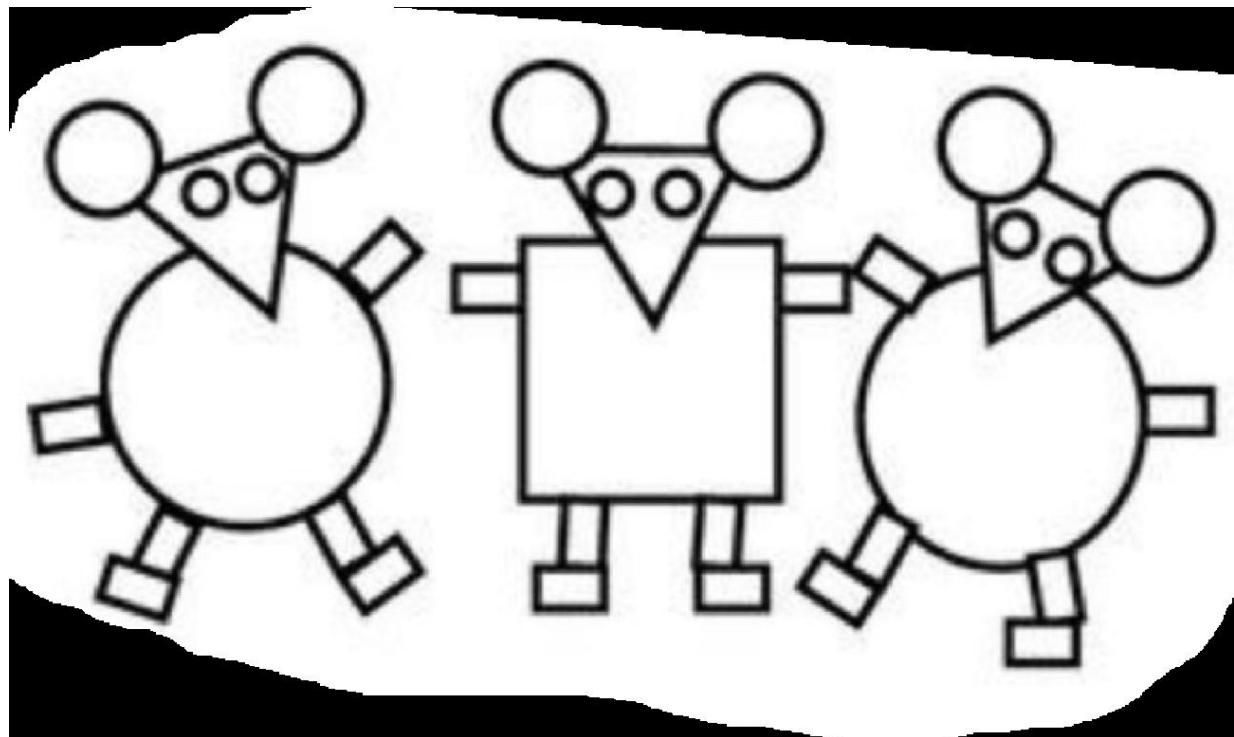

<input type="checkbox"/>	—

$$\square - \triangle + \square - 1 = \circleddash$$

## LET'S PLAY!

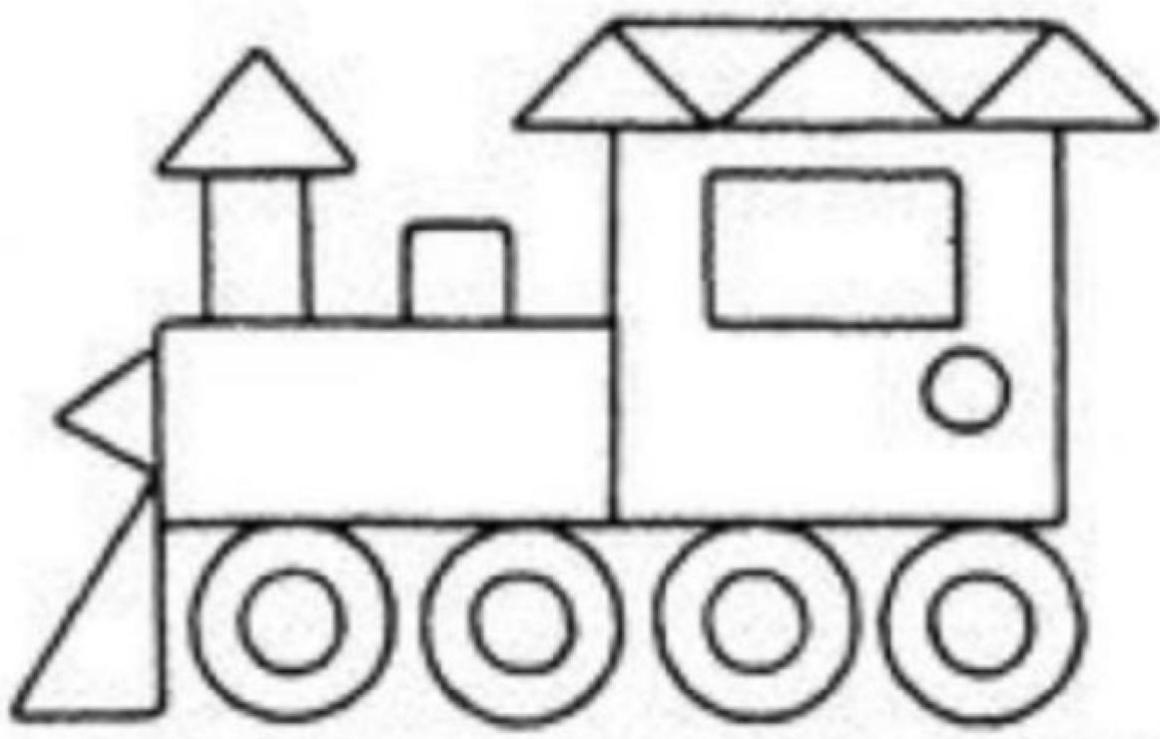

Count up the geometric shapes and write the number next to them. Solve the equation to check yourself.

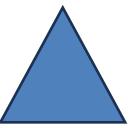

$$\square - \triangle - \square = \circleddash$$

# LET'S PLAY!

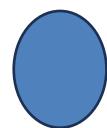

Count up the geometric shapes and write the number next to them. Solve the equation to check yourself.

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

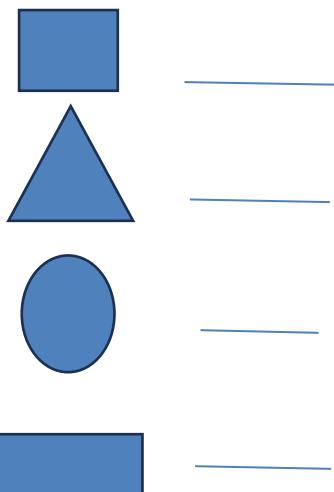

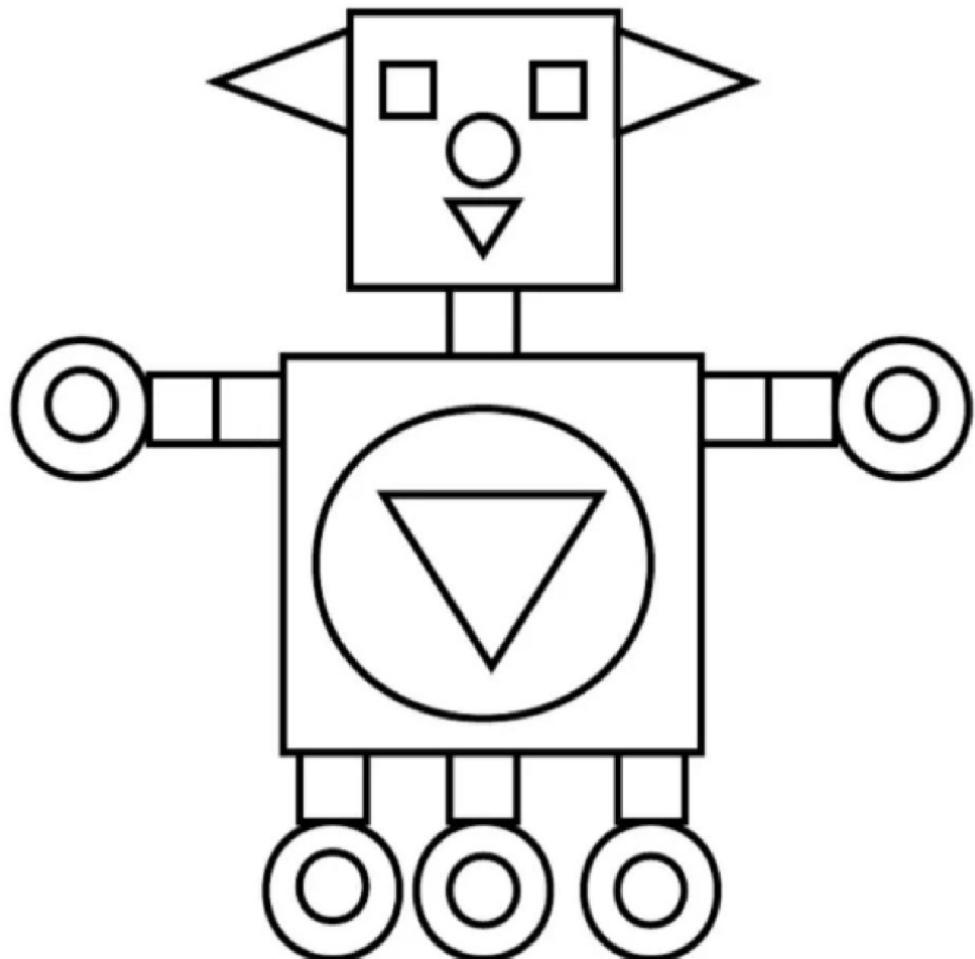

\_\_\_\_\_

$$\triangle - \square + \square = \circleddash$$

# LET'S PLAY!

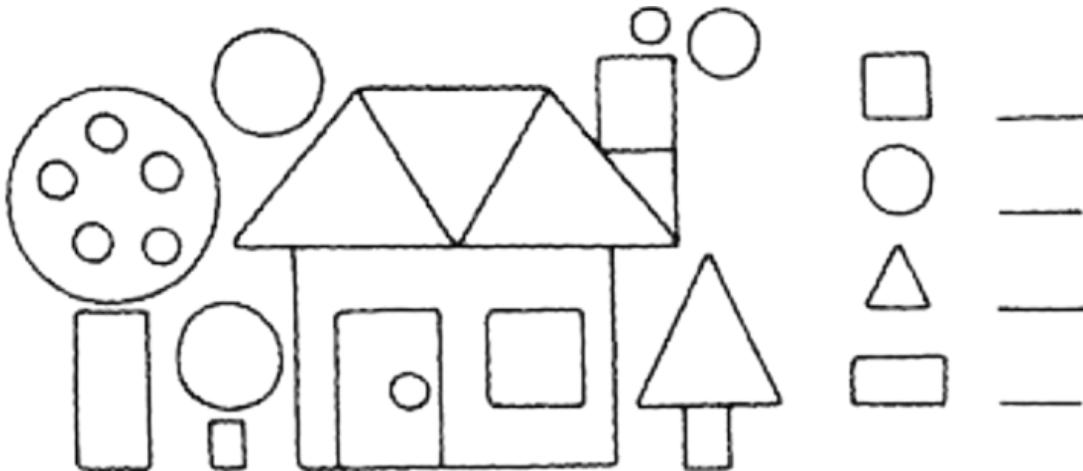

Count up the geometric shapes and write the number next to them. Solve the equation to check yourself

$$2(\triangle + \square) - \square + \circle = \circle$$

# EXAMPLE

Count up the geometric shapes and write the number next to them. Solve the equation to check yourself.

$$(\textcolor{red}{\triangle} + \textcolor{red}{\square}) : \textcolor{red}{\square} = \textcolor{red}{\circle}$$

$$(5 + 6) : 1 = 11$$

COUNT ME IF YOU CAN

ADVANTAGES	ADVANTAGES
DISADVANTAGES	DISADVANTAGES
Learning the geometric shapes	Learning the geometric shapes
Children may not notice a geometric	Children may not notice a geometric

---	---	---	---	---	--

- En el cuadro debemos colocar los números del 1 al 9 sin repetirse ninguno (uno en cada cuadro). Disponemos de las siguientes pistas:

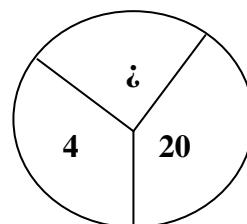

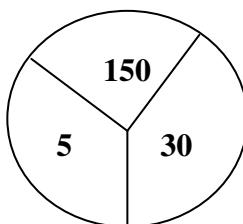

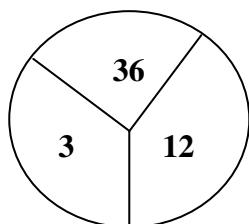

- Los vecinos del 1 suman 15.
- Los vecinos del 2 suman 6.
- Los vecinos del 4 suman 23.
- Los vecinos del 5 suman 16.
- Sobre los vecinos del 6, 7, 8 y 9 no tenemos datos

Un número es vecino de otro sólo si la casilla en la que esté, ésta comparte alguno de sus lados con el otro.

¿Qué número ocupará la casilla central?

- ¿Qué número falta?

- Completa las series:

a) 

1	4	9	16		
---	---	---	----	--	--

f) 

49	36	25

## PROBLEMAS LÓGICOS

- 1.-** Sabiendo que la longitud del monstruo del lago Ness es de 30 metros más la mitad de su propia longitud, ¿cuántos metros mide de largo?
- 2.-** Una abuela reparte una cantidad de dinero entre sus diez nietos de la siguiente forma: al 2º le deja la mitad que al 1º, al 3º la mitad que al 2º, al 4º la mitad que al 3º y así sucesivamente. Si al más pequeño le deja 1 euro, ¿qué cantidad de dinero repartió?
- 3.-** Seis amigos se encuentran en la calle y se saludan dándose un abrazo. ¿Cuántos abrazos se han dado en total?
- 4.-** El término que sigue a la serie: 100, 121, 144, ..., es:
- 5.-** Unas gafas valen 185 euros más que su funda. Las gafas y la funda valen 235 euros. ¿Cuánto cuestan las gafas?
- 6.-** El reloj de la figura ha perdido la aguja de los minutos, pero sabemos que el ángulo dibujado es de  $72^\circ$ . ¿Qué hora es en ese momento?
- 
- 7.-** Observa este dibujo, del que tú sabes que el ángulo 1 sumado con el ángulo 2, da  $180^\circ$ . Si te dicen que el ángulo 3 es igual al ángulo 4, ¿cuánto vale el ángulo 4?
- 
- 8.-** ¿Qué número es el  $2 \times 10^6 + 8 \times 10^5 + 3 \times 10$ ?
- 9.-** Un ascensor sale de la planta baja, desciende al 2º sótano, sube 6 pisos, baja 2, sube 3, baja 8 y sube 4. ¿En qué piso se encuentra?
- 10.-** Un libro tiene 216 páginas de 32 líneas. ¿Cuántas páginas tendría si tuviera 24 líneas en cada una?

**11.-** En un torneo de ajedrez hay 6 jugadores. Cada jugador juega 3 partidas con cada uno de los otros. ¿Cuántas partidas se han jugado durante este torneo?

**12.-** ¿Qué ángulo forman las agujas del reloj a la 1 h 25'?

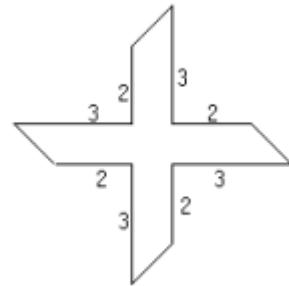

**13.-** En los dos últimos Concursos de Primavera, Marta obtuvo 60 y 80 puntos. Si en el de este año obtiene 76 puntos, entonces su media...

**14.-** Si 20 gatos comen 20 ratones en 20 días, ¿cuántos ratones comen 10 gatos en 10 días?

**15.-** En una clase hay 7 chicas por cada 5 chicos. Si el profesor reparte un día 90 caramelos a partes iguales entre todos y cada uno recibe 3, ¿cuántos caramelos le han sobrado al profesor?

**16.-** Juan tiene 24 monedas más que su primo Jorge, que tiene 15 monedas más que Javier. Si entre los tres tienen 99 monedas, ¿cuántas tiene Javier?

**17.-** La figura que te mostramos, tiene una anchura uniforme de 1 cm. Las otras dimensiones son, en centímetros, las que te indicamos. ¿Cuál es, en  $\text{cm}^2$ , su área?

**18.-** Alicia, Beatriz, Carlos y David se ponen en fila. David no es el primero. Beatriz está entre Alicia y Carlos y Alicia está entre David y Beatriz. Si le asignamos el 1 al primero, el 2 al segundo, el 3 al tercero y el 4 al cuarto, el producto de los números de Alicia y Beatriz es:

**19.-** En España se utiliza un convenio para escribir una fecha: en primer lugar el día y luego el mes; por ejemplo 18-06 es el 18 de Junio, pero en EEUU el convenio es al revés, así pues 04-01 es 1 de Abril. ¿Cuántos días al año pueden plantear dudas según se escriban en un sitio o en otro?

**20.-** La tabla muestra la distancia entre 3 ciudades. Si  $AB + BC = AC$ , ¿Cuál es la distancia que separa las ciudades A y B?

	A	B	C
A	-		21
B		-	
C		5	-

**21.-** Si expresamos el producto  $2,73 \times 0,01$  como un número decimal, obtenemos:

**22.-** Redondeando a las unidades el número 10,82 nos da:

**23.-** El resultado de la división de 23,1 entre 0,1 es:

**24.-** El número que debería haber en el cuadro para que la igualdad  $5,6 + \square = 24,3$  fuera cierta es:

**25.-** El 15% de 200 es igual a:

**26.-** Sobre un paralelogramo ABCD hacemos los siguientes enunciados: 1. Todos los lados son iguales. 2. Las diagonales son iguales. 3. Las diagonales son perpendiculares. 4. Puedo escoger dos ángulos que sumen  $180^\circ$ . 5. Hay dos parejas de lados paralelos. Sea cual sea el paralelogramo, podemos asegurar que son siempre verdaderos:

**27.-** Sobre un triángulo isósceles ABC hacemos los siguientes enunciados: 1. Los ángulos suman  $180^\circ$ . 2. El punto de corte de las alturas dista lo mismo de los tres vértices. 3. Hay dos alturas que tienen la misma longitud. 4. El punto de corte de las alturas está en una bisectriz. 5. El punto de corte de las alturas nunca coincide con un vértice del triángulo. Sea cual sea el triángulo isósceles, podemos asegurar que siempre son verdaderos:

**28.-** ABC es un triángulo rectángulo con ángulo recto en A. Si  $AB = 3$  cm,  $AC = 4$  cm,  $BC = 5$  cm, su área, en  $\text{cm}^2$ , es igual a:

**29.-** "Alicia tiene por lo menos 5 euros", dijo Pedro.

No, respondió Dani, "tiene menos de 5".

Puede ser, dijo Rocío, "pero por lo menos tiene 1".

Sabiendo que sólo uno de ellos dijo la verdad, ¿cuántos euros podría tener Alicia?

**30.-** Tengo 51 monedas en mi monedero que son o bien de 1 euro o bien de 20 céntimos. Si tengo en total 35 euros, ¿cuántas monedas tengo de 1 euro?

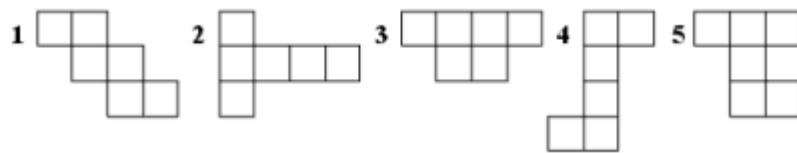

**31.-** Dani elige un número de dos cifras, se lo resta a 200 y luego multiplica el resultado por 2. ¿Cuál es el mayor número que puede obtener

32.- Si ni A ni B son cero, ¿cuántas cifras tiene el número obtenido en la suma indicada?

$$\begin{array}{r} 9876 \\ + \quad A32 \\ \hline B1 \end{array}$$

33.- La media de mis cuatro últimas notas en matemáticas es un 7. Si la cuarta nota ha sido un 8, ¿cuál es la suma de las tres primeras?

34.- ¿Cuáles de estos desarrollos corresponden a un cubo?

35.- Cuatro personas se sientan en un banco para hacerse una foto, pero dos de ellas no quieren aparecer separadas. ¿De cuántas maneras pueden entonces sentarse?

36.- El mayor capicúa múltiplo de 6 menor que 1000 es

37.- Si dos números suman 1024 y se diferencian en 148, uno de ellos es:

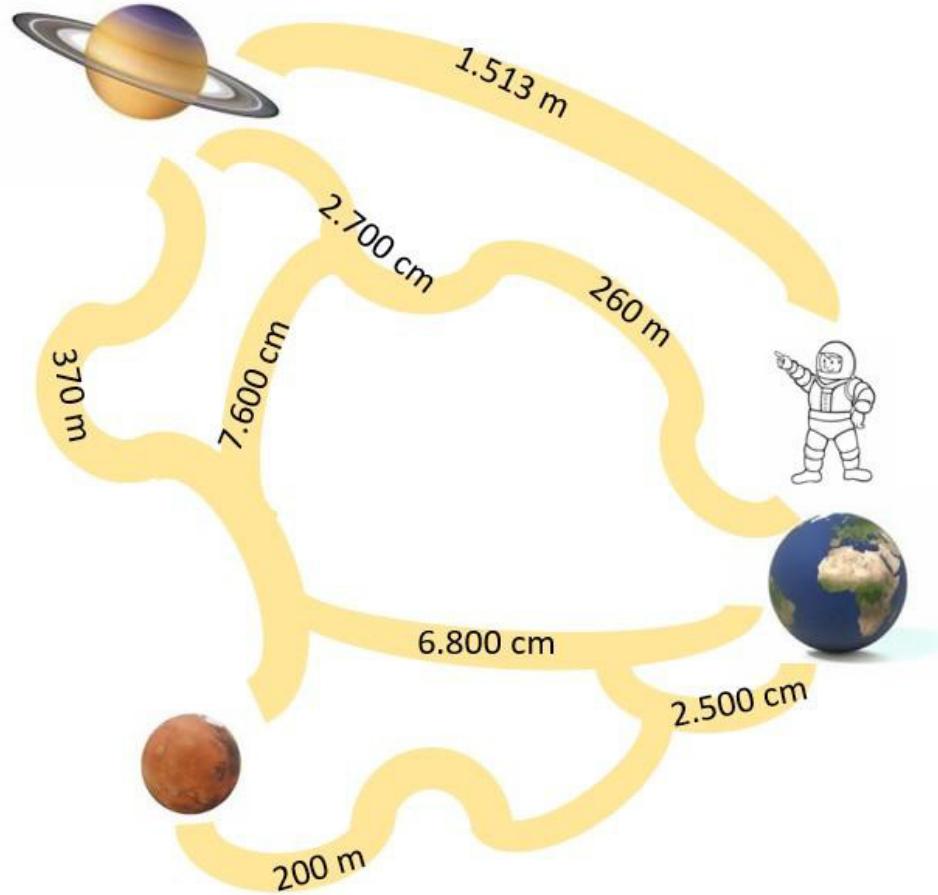

## HOW FAR AWAY THE STARS CHALLENGE

*The mathematician who wants to become an astronaut*

George wants to become an astronaut one day. He trains hard in a microcosmos and he has to calculate the shortest routes he should take to a planet.

- A). How long is the shortest path from planet Earth to planet Saturn?
- B). How long is the shortest path between Saturn and Mars?
- C). How long is the shortest path between Earth and Mars?

**Mathematics DOMINO: 8-15 YEARS OLD: PLAYED WITH 2 PEOPLE:**

It is a competitive mind game that contributes to strategy development, reasoning and quick thinking skills. Contributions of Playing This Game to Our Students;

1. It improves creativity.
2. It helps the development of abstract thinking.
3. It offers unlimited opportunities to use one's imagination.
4. Improves problem solving skills.
5. It reinforces empathy skills.
6. It provides the opportunity to explore different perspectives.
7. Improves skills in performing four operations. (

## **Domino Game Rules**

Counting is done to determine the playing order. First time starting the game

The next player shuffles the cards and gives each player 4 playing cards and 1 wild card. He reveals a card to the ground. He reveals the remaining cards face down in a tower shape.

Math domino game can be played with a maximum of 5 people so that each player drops an equal number of playing cards and wild cards. If you are playing with 2 players, each player is given two wild cards.

Players will take turns finding the white answer of the card in the middle from the purple actions in their hand or the answer to the purple action from the white numbers and matching them as in the images in the box. player's

If he doesn't have a matching card in his hand, he draws a card from the ground. If the card he draws is not good, the turn passes to the other player. The first player to finish the cards in his hand wins the game.

How to use joker cards?

While playing math dominoes, since the cards are lined up end to end, the game can only be continued from the two exposed ends. If the answer to the operation at an open end matches the answer to the action at the other end, it is not possible to progress because the game is blocked. This situation-

The next player uses the joker card in his hand and continues the game by placing any game card he wants on the table.

If the next player has no joker cards left, he must pass.

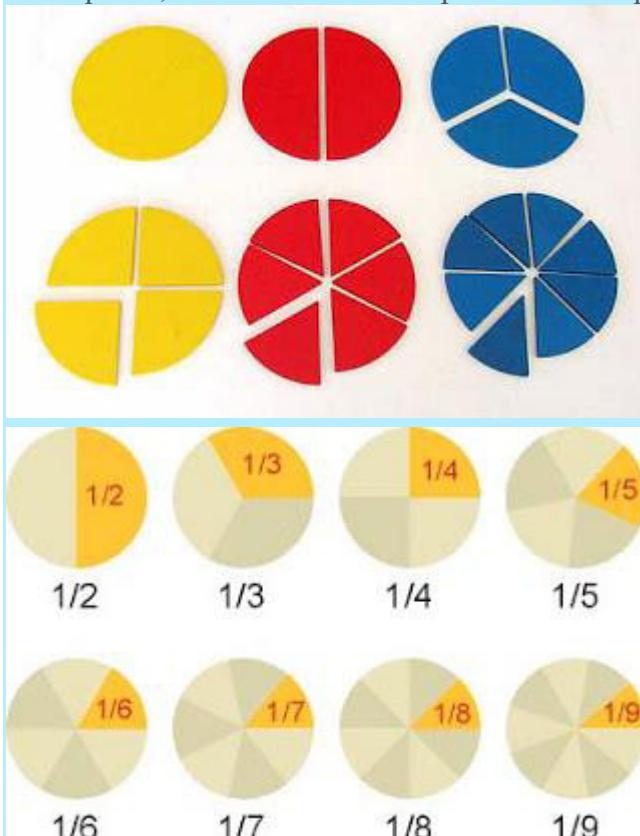

Math Domino is a game that requires attention. When it is your turn, you need to constantly follow the game and pay attention to your cards in order to see whether there is a card among the cards in your hand that matches the action or action answer on the table. Carefully

If you don't, you may lose your turn even though you have the correct card in your hand.

## **LA TORTA DE FRACCIONES**

La torta de fraccionarios se desarrolla en el pensamiento matemático desde muchas perspectivas, ya que este facilita múltiples aplicaciones a nivel matemático. Se considera que fueron los egipcios quienes usaron por primera vez las fracciones, pero sólo aquellas de la forma  $1/n$  o las que pueden obtenerse como combinación de ellas. Los egipcios utilizaron las fracciones cuyo numerador es 1 y cuyo denominador es 2, 3, 4,..., y las fracciones  $2/3$  y  $3/4$  y con ellas conseguían hacer cálculos fraccionarios de todo tipo.

El concepto matemático de fracción corresponde a la idea intuitiva de dividir una totalidad en partes iguales, como cuando hablamos, por ejemplo, de un cuarto de hora, de la mitad de un pastel, o de las dos terceras partes de un depósito de gasolina.

### **Objetivos a conseguir:**

1. Identificar la unidad (círculo compacto)
2. Realizar construcciones de fracciones de las partes al todo
3. Realizar sumas y restas de fracciones
4. Hallar fracciones equivalentes

## Maths & DARTS

### How to play maths & darts:

A hunter trains for a hunting game.

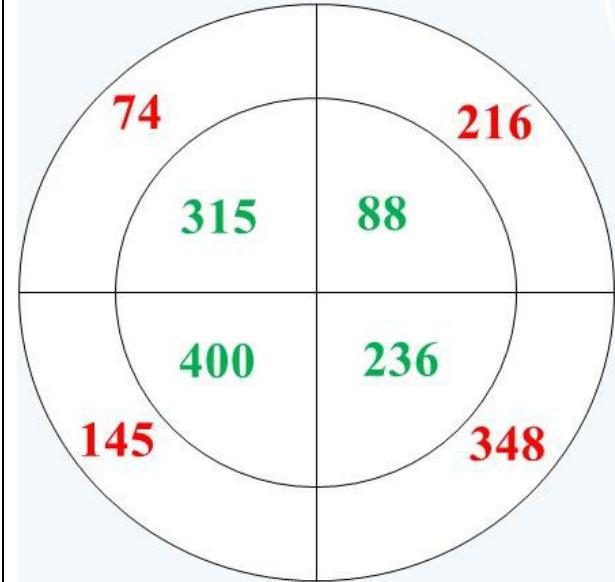

What number from the two circles should the hunter shoot, so that the difference give the desired result?

- solve the additions and the subtractions by choosing a number from each circle of the darts board
- you cannot choose more than one number from the same circle.

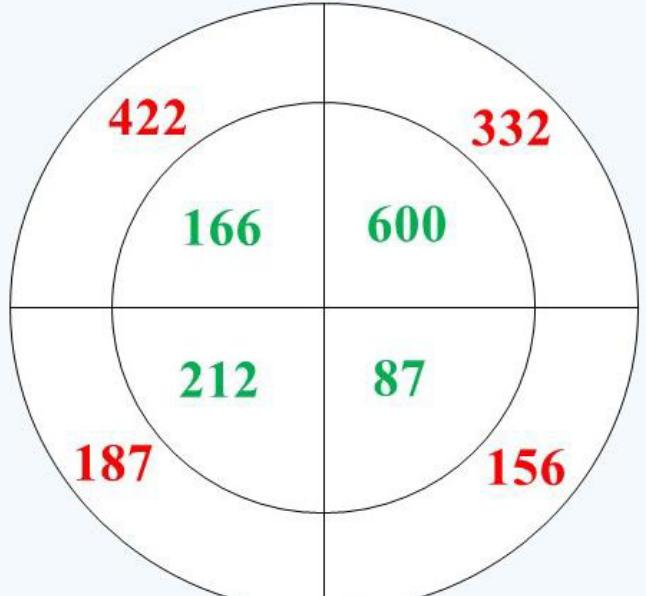

### LET'S play!

# POSSIBLE ANSWERS:

- Slide 13:

$$408 = 278 + 130$$

$$439 = 183 + 256$$

$$301 = 431 - 130$$

$$622 = 76 + 546$$

$$182 = 278 - 96$$

- Slide 14:

$$241 = 315 - 74$$

$$381 = 236 + 145$$

$$184 = 400 - 216$$

$$304 = 88 + 216$$

$$663 = 315 + 348$$

- Slide 15:

$$588 = 166 + 422$$

$$268 = 600 - 332$$

$$56 = 212 - 156$$

$$413 = 600 - 187$$

$$509 = 87 + 422$$

- Slide 16:

$$184 = 512 - 328$$

$$531 = 146 + 385$$

$$886 = 72 + 814$$

$$415 = 123 + 328$$

$$127 = 512 - 385$$

- Slide 17:

$$166 = 261 - 95$$

$$425 = 714 - 289$$

$$708 = 86 + 622$$

$$278 = 434 - 156$$

$$417 = 261 + 156$$

# MODEL

Sums:

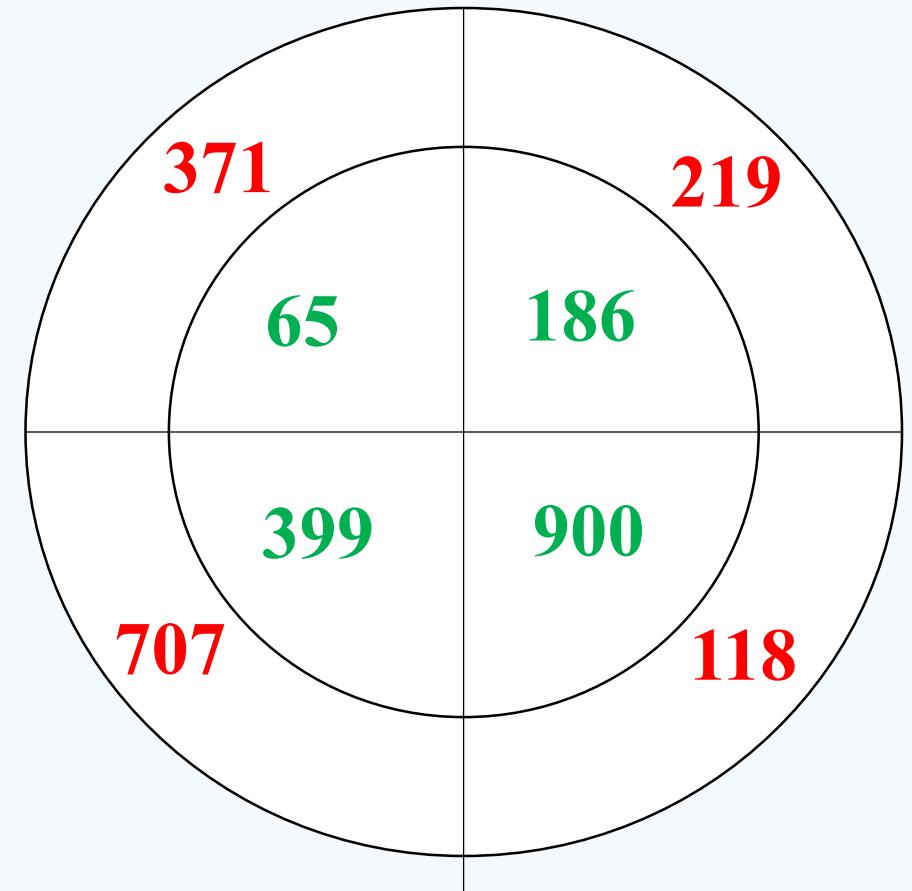

$$618 = 399 + 219$$

$$193 = 900 - 707$$

$$405 = 186 + 219$$

$$183 = 65 + 118$$

$$529 = 900 - 371$$

# ADVANTAGES & DISADVANTAGE

It is good that:

- This game develops concentration and attention
- You practice addition and subtraction
- It is a funny way to learn maths

Downside(s):

- This game may be time consuming

Co-funded by the  
Erasmus+ Programme  
of the European Union

## TIME

Knowing that....

1. 1 minute = 60 seconds
2. 1 hour = 60 minutes = 3,600 seconds
3. 1 day = 24 hours
4. 1 week = 7 days

**...fill in the table:**

DAYS	3 days			
HOURS		48 hours		
MINUTES				14,400
SECONDS			86,400	

2. Write what time each clock shows, for the afternoon, but also for the morning:

:
---

:
---

:
---

:
---

:
---

:
---

:
---

:
---

:
---

:
---

: :

3. Draw the indicated times on the clock face:

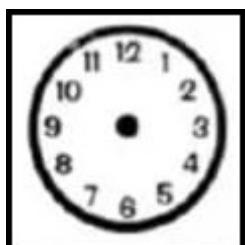

4:00

13:15

8:45

4. How many hours?

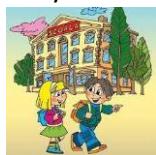

John started his jogging at 16.00 and returned at 17.30. How many hours did he run?

George's plane took off at 7.00 and it landed at 14.00. How long was the trip?

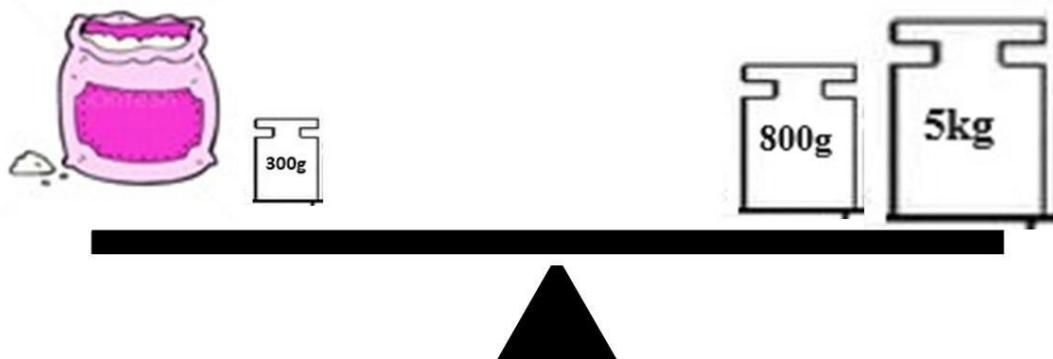

They start classes at 7.30 and finish them at 13.30. How many hours do they stay at school?

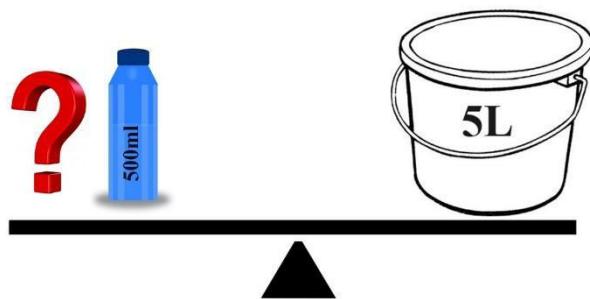

5. In the 7th grade, all children are born in the same year but on different dates: Maria November 16, Sofia December 22, David March 30, Stefan June 15, Alexandra December 5. Place them in ascending order of their age, from youngest to oldest.

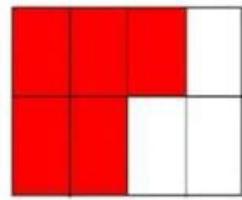

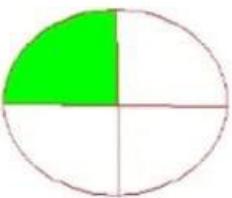

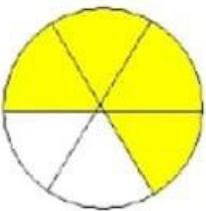

6. Balance the scales! Complete the bag of flour with the missing weight!

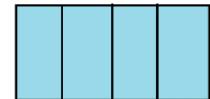

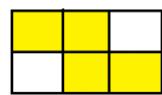

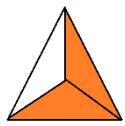

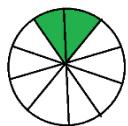

7. How many 500 ml bottles do we need to fill a 5 litre bucket?

8. Write the fractions that correspond to the following drawings:

9. Associate the figures with the corresponding fractions:

$$\frac{2}{3}$$

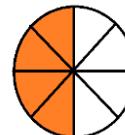

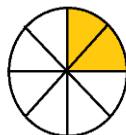

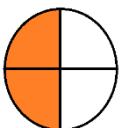

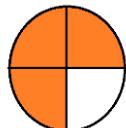

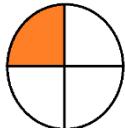

$$\frac{4}{6}$$

$$\frac{3}{6}$$

$$\frac{4}{4}$$

$$\frac{2}{10}$$

10. Express the colored surface in each drawing as a percentage:

.....%

958 - 90	688 + 282	425 + 11	700 - 268	375 + 552
868	970	436	432	927
G	R	E	A	T

# A SECRET MESSAGE

ADVANTAGES	DISADVANTAGES
Develops children's ability to perform mathematical operations	Children's lack of attention could lead to refusal to do the exercise
It catches children's attention in a funny way	It is an individual, not a team game

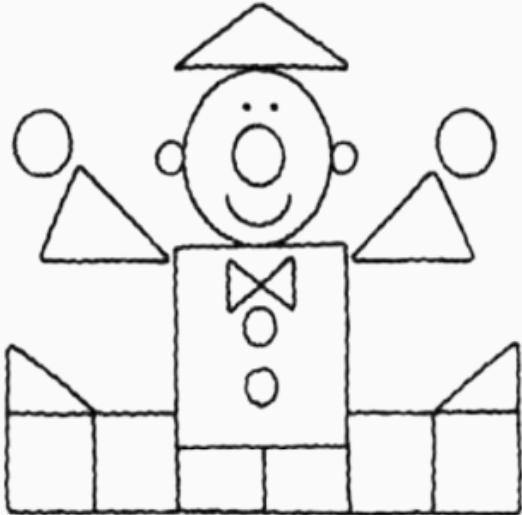

# “COUNT ME IF YOU CAN” RULES

- 1) Count how many geometric shapes there are and write down the number next to each one
- 2) Finally, check your answer by replacing the geometric shapes with the numbers in the equation.

# LET'S PLAY!

Count up the geometric shapes and write the number next to them  
Don't take the clown's eyes into account. Solve the equation to check yourself.

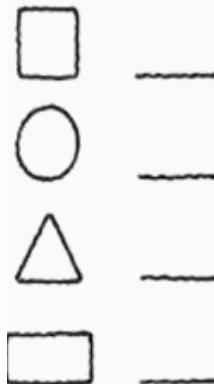

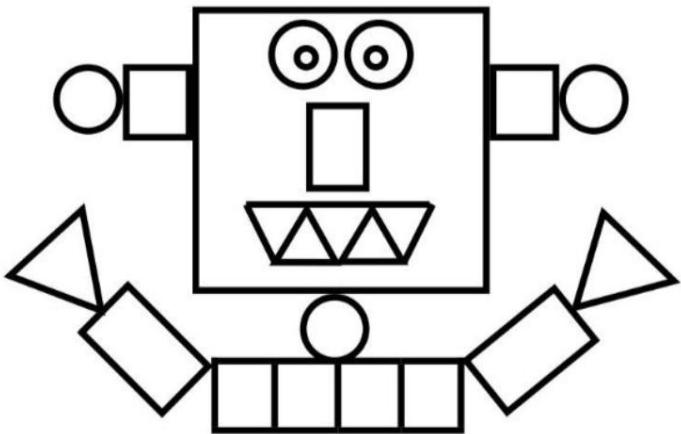

<input type="text"/>	—
<input type="text"/>	—
<input type="text"/>	—
<input type="text"/>	—

$$\text{pink circle} - \text{pink triangle} + \text{pink rectangle} = \text{pink square}$$

# LET'S PLAY!

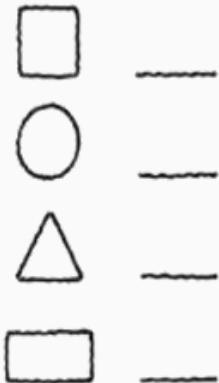

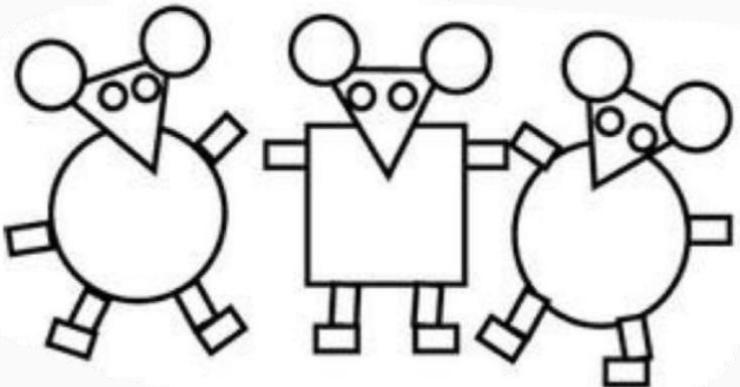

Count up the geometric shapes and write the number next to them. Solve the equation to check yourself.

$$\square - \triangle + \square - 1 = \circleddash$$

# LET'S PLAY!

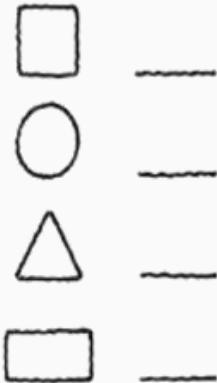

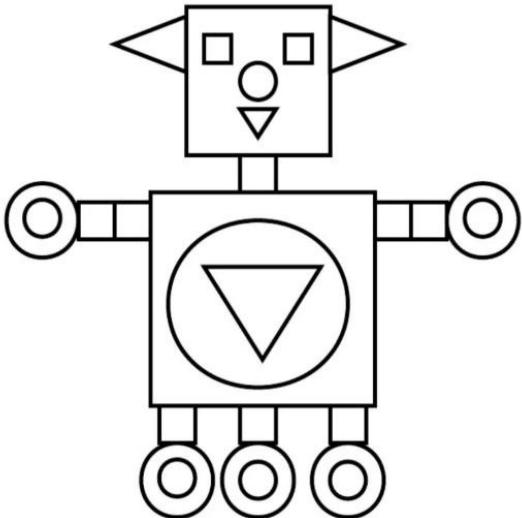

Count up the geometric shapes and write the number next to them. Solve the equation to check yourself.

$$\square - \triangle - \square = \circleddash$$

# LET'S PLAY!

Count up the geometric shapes and write the number next to them. Solve the equation to check yourself.

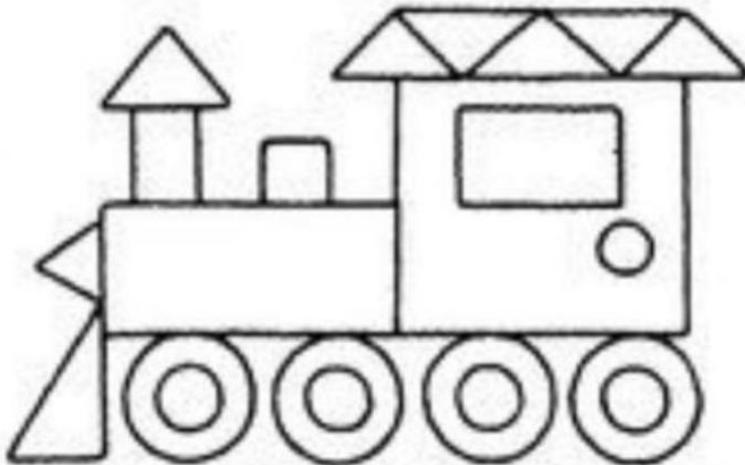

$$2(\triangle + \square) - \square + \circ = \circ$$

# LET'S PLAY!

Count up the geometric shapes and write the number next to them. Solve the equation to check yourself.

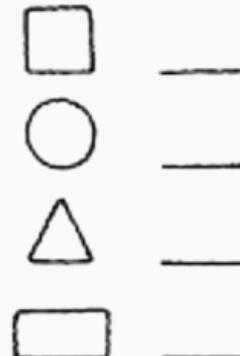

<input type="text"/>	—
<input type="text"/>	—
<input type="text"/>	—
<input type="text"/>	—

$$\triangle - \square + \square = \circleddash$$

# EXAMPLE

Count up the geometric shapes and write the number next to them. Solve the equation to check yourself.

$$(\triangle + \square) : \square = \text{circle}$$
$$(5 + 6) : 1 = 11$$

# COUNT ME IF YOU CAN

ADVANTAGES	DISADVANTAGES
Learning the geometric shapes	Children may not notice a geometric figure, and the operation will not have a correct result.
Develops the children's attention.	It is an individual, not a team game.

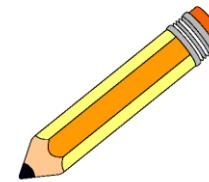

# EVERYTHING STARTS WITH MATHEMATICS

Co-funded by the  
Erasmus+ Programme  
of the European Union

# STOP THE PENCIL!

NUMBER	FRONT NUMBER	BACK NUMBER	+5	-5	X10	:10	HALF	DOUBLE

Each round adds 10 points.

The team that takes the least time to complete the test wins.

## SUPERTMATIK

Con este juego se organizan campeonatos escolares de cálculo mental a nivel estatal e internacional.

**Número de jugadores:** 2-4 jugadores.

**Cómo jugar:**

Los jugadores/as deben ir acertando las operaciones para ganar cartas y formar la palabra SUPERT, con la cual ganan la partida. Tiene 5 niveles de juego, dependiendo de la dificultad.

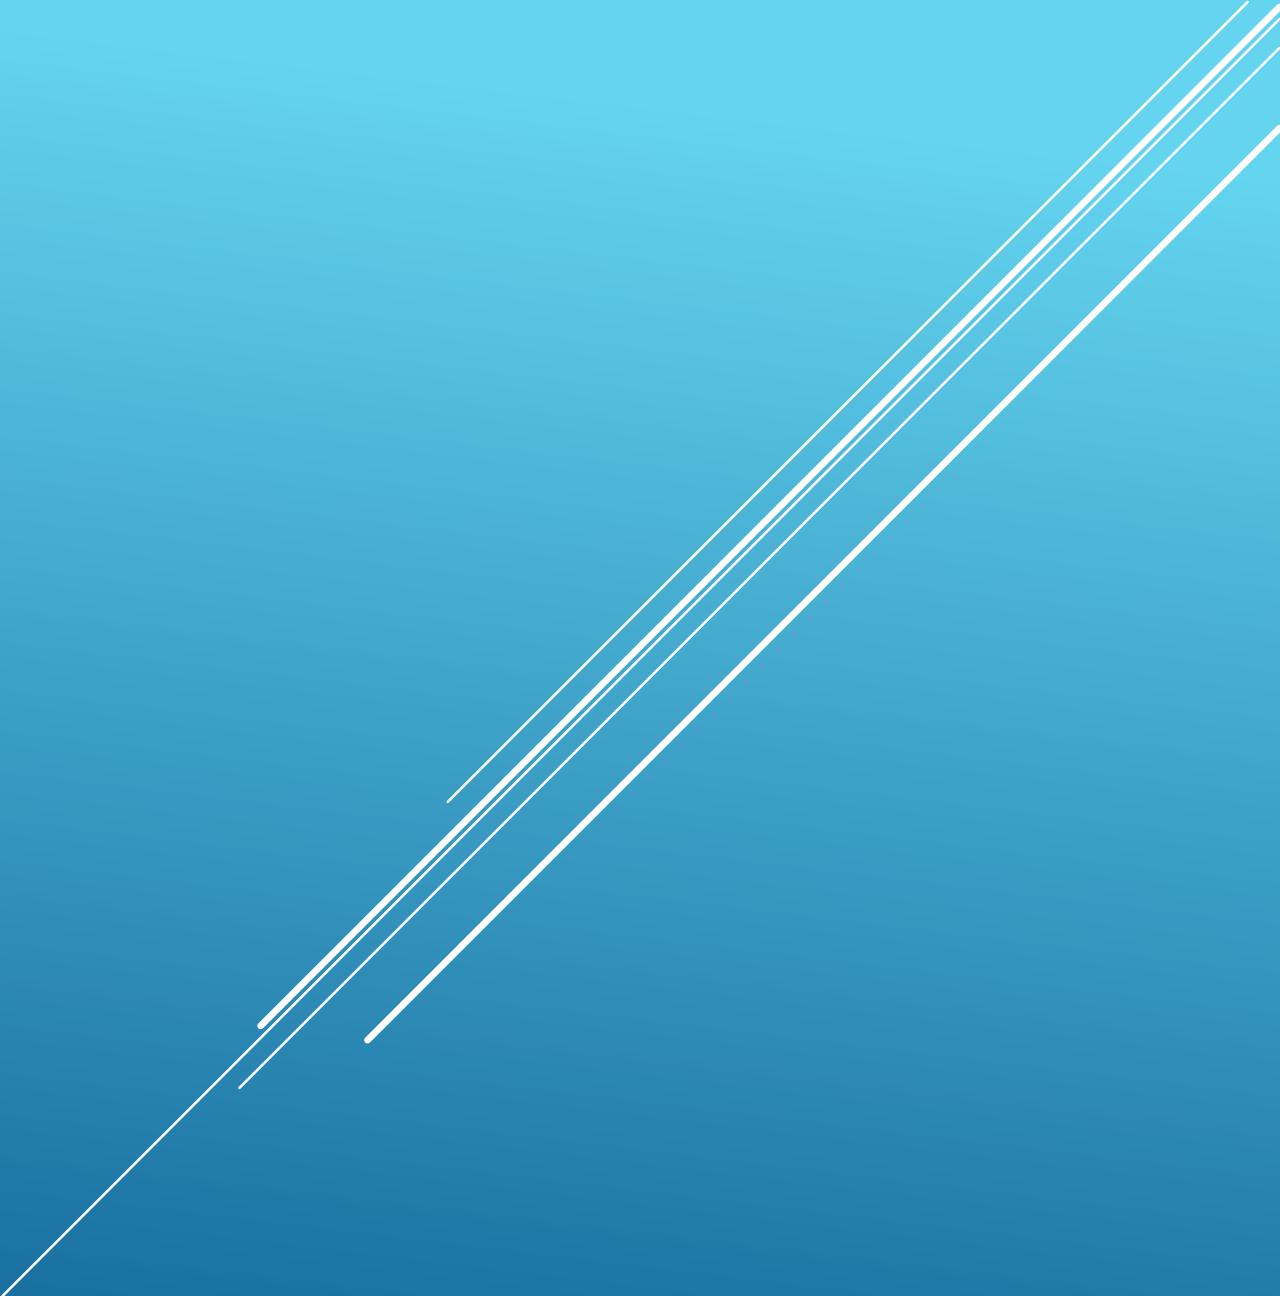

**Propiedades:**

- Promover el interés por el cálculo mental y desarrollar las habilidades numéricas y de cálculo mental.
- Reforzar y descubrir el aprendizaje de las matemáticas a través del juego.

**Contenido:**

- Baraja con 54 cartas.
- Instrucciones (en castellano).

# CÁLCULO

- ▶ SE TRABAJARÁ EN GRUPOS Y SE VALORARÁ EL MODO DE TRABAJO:
  - ▶ ORDENADO
  - ▶ RESPETUOSO
  - ▶ COLABORACION
  - ▶ EXPOSICIÓN
- ▶ HAY 5 ACERTIJOS Y SE TENDRÁ PARA CADA UNO 5 MINUTOS EN TOTAL, EN DOS SESIONES DE 2`5 MINUTOS CADA UNA

▶ **LO IMPORTANTE NO ES LA SOLUCIÓN,**  
▶ **SINO CÓMO TRABAJAMOS PARA ALCANZARLA**

# Elementary Math Learning Games

Tik Tack Toe & the Three Piece Shooter

# “Tik Tack Toe” Rules

1

You decide which player plays with "x" and which with "0"

2

The first player places the chosen symbol in any of the 9 squares, except for the one in the middle

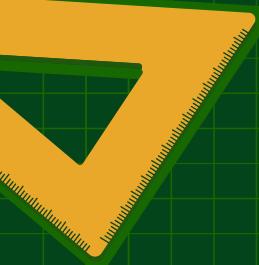

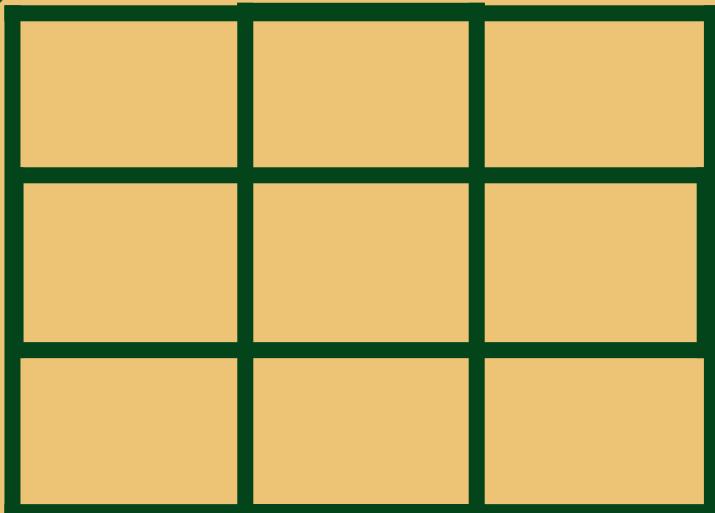

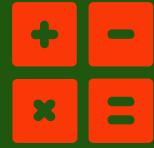

3

Each player makes one move in turn

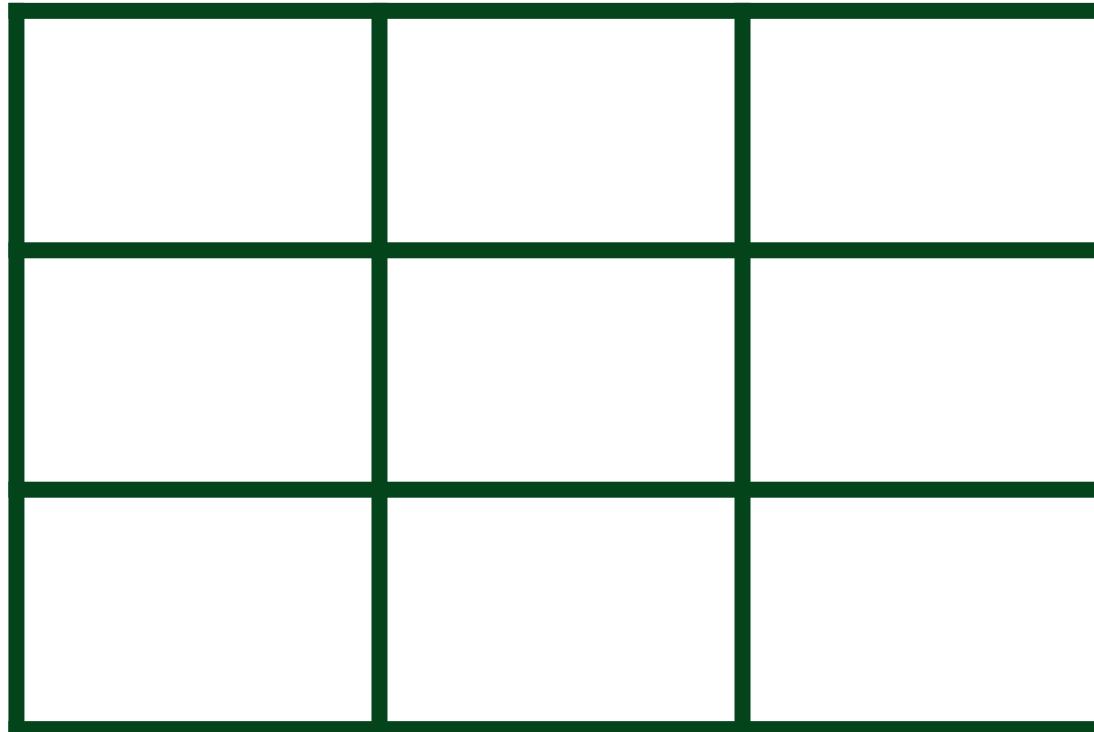

4

To win, you must get 3 symbols chosen in a line: diagonal, vertical, horizontal

# Let's play!

# Let's play!

# Tik Tack Toe

## ADVANTAGES

- It develops strategic thinking
- it's a simple game, which you can play when bored

## DISADVANTAGES

- it can get boring if you play with the same person, because you start to learn their strategy;
- does not develop team spirit

# "Three Piece Shooter" Rules

1

Each player has  
3 pieces

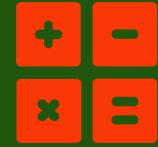

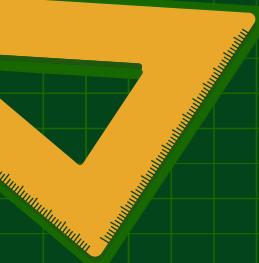

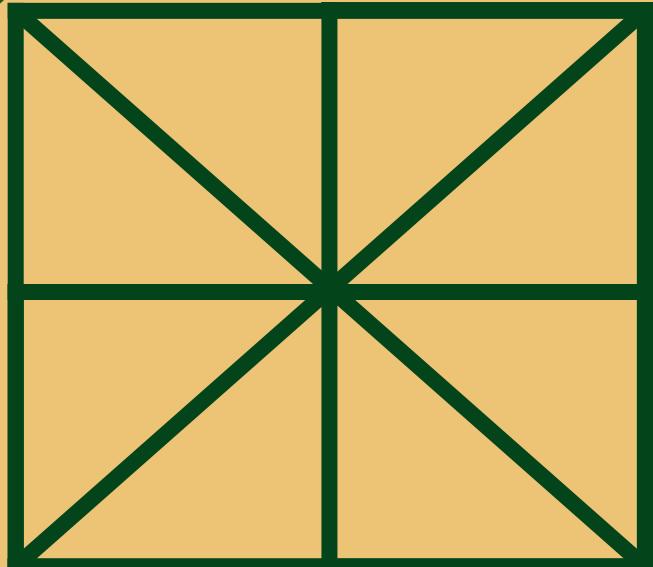

2

The players put  
a single piece  
on the board, in  
each of the first  
three turns they  
play

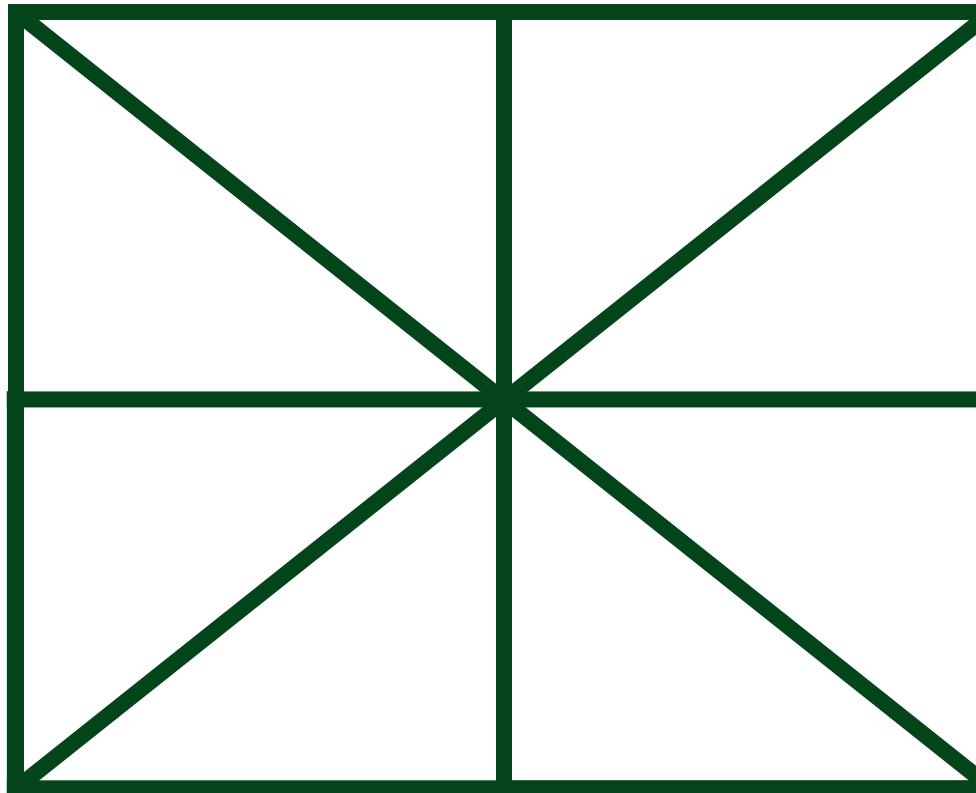

3

The winner is  
the first one who  
succeeds in  
building a "mill",  
i.e. three pieces  
placed next to  
each other, as in  
"x and O"

# Let's play!

# Let's play!

# THREE PIECE SHOOTER

## ADVANTAGES

- it helps us to get smarter
- it's a funny game

## DISADVANTAGES

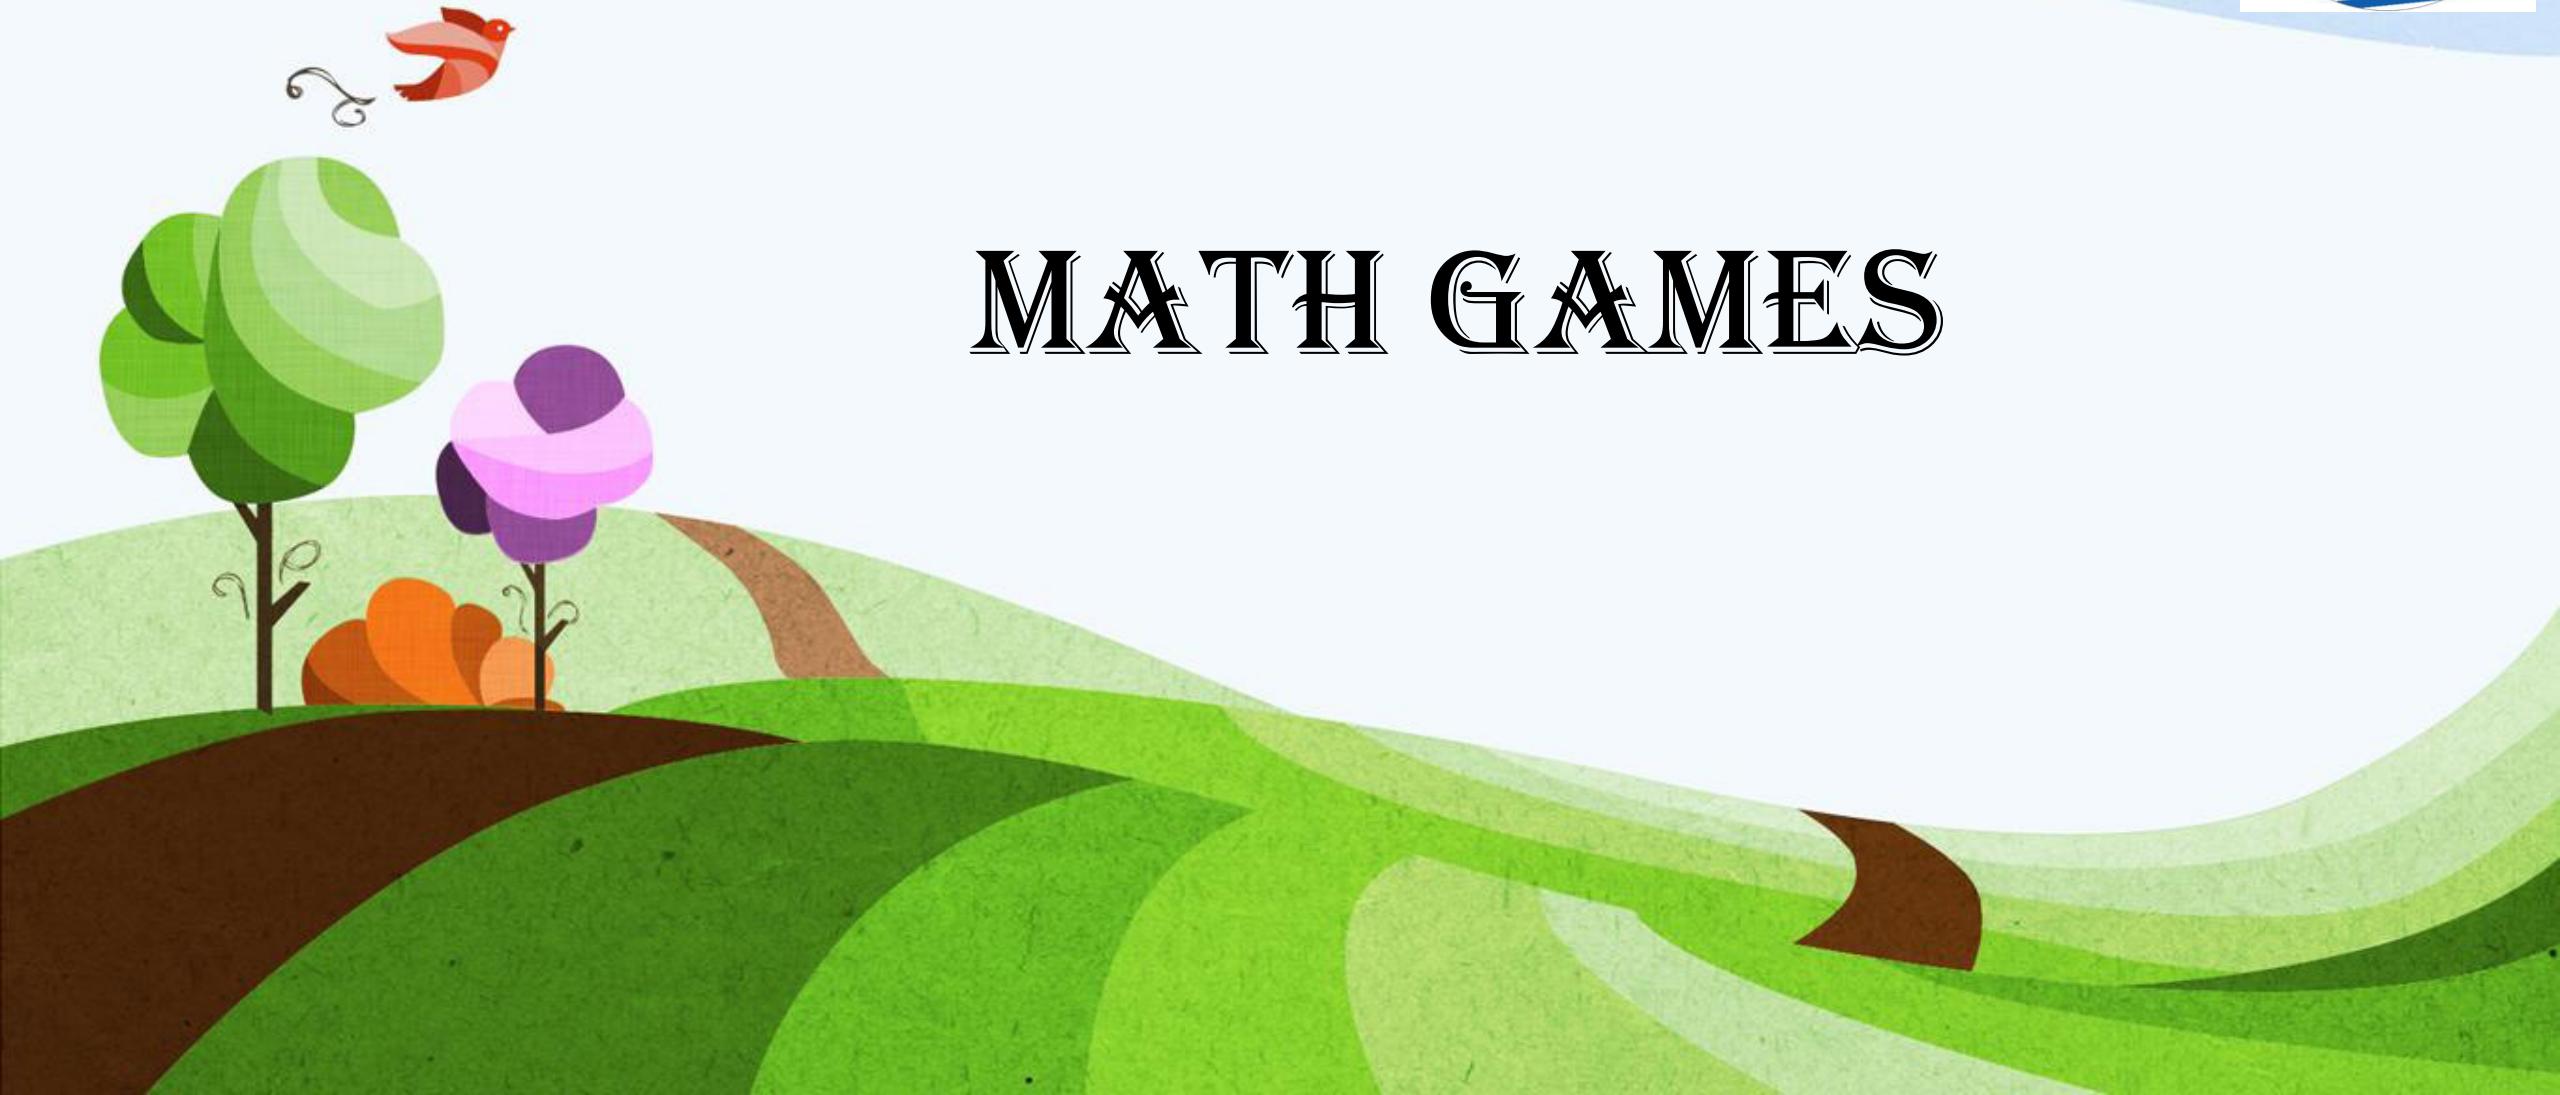

- it can be hard to understand
- it promotes competitiveness, rather than collaboration

Co-funded by the  
Erasmus+ Programme  
of the European Union

# MATH GAMES

# TRUE OR FALSE

# RULES

- The children will work in pairs and do the calculations on the petals of the flowers.
- If the result on the left leaf is right, they will write T (True) on the right leaf. If the result is incorrect, they will write F ( false).
